

Excellent Yields and Improved Clubroot Resistance

Growing Zone	Maturity	Height	Lodging	Disease Rating
ALL	Intermediate	Medium-Tall	Very Good	R to Blackleg R to Clubroot

- Excellent yield potential
 - Competitive with all top hybrids currently on the market
 - 105% of 45H29¹
- Superior lodging resistance to 45H29
- Improved clubroot resistance
 - Resistant to existing pathotypes 2,3,5,6,8
 - Intermediate resistance to the new 5x pathotype – *currently the only hybrid on the market to have shown tolerance to this pathotype*
- Broad adaptability – competitive with 45H29 in all zones

45H29 (Left) vs. CS2000 (Right) – July 23, 2014

45H29 (Left) vs. CS2000 (Right) – August 25, 2014
