

The 'Go-to' Yellow Pea

Key Features

- Industry Standard
- Very Good Lodging Resistance
- R to Powdery Mildew

Overall Characteristics

Yield - Very Good	Lodging: Very Good
Days to Maturity - Medium	TKW: 230 g
Disease Resistance: R to Powdery Mildew, I to Fusarium Wilt	
Origin - AAFC, Morden Research Station (Test Code: MP 1824)	

Overall characteristics based on 2016 Provincial Seed Guides

Varietal Characteristics:

- **Growing Zone:** Suited to all pea-growing zones.
- **Yield:** Very Good
- **Maturity:** Similar to AAC Lacombe
- **Vine length:** Medium
- **Lodging:** Good
- **Seed Size:** 230g /1000 seeds.
- **Quality:** Round Seed Shape
- **Disease Resistance:** R to powdery mildew, I to Fusarium Wilt, similar response to Mycosphaerella Blight to checks.

Seed Manitoba - 2016

Variety	Yield (bu/ac)	Maturity Class	Vine Length	Lodging	TKW (g)	Seedcoat Breakage (%)	Powdery Mildew	Seed Coat Dimpling
AC™ Agassiz	74	Medium	Medium	Good	230	Good	VG	Fair
Eclipse	71	Medium	Medium	Good	250	Good	VG	Fair
AAC Lacombe	72	Medium	Long	Good	270	Good	VG	Good

SaskSeed - Seed Guide 2016

Variety	Yield (%) 1,2 & South 3	Yield (%) North 3 & 4	Yield (%) Irrig	Maturity Class	Vine Length (cm)	Lodging	TKW (g)	Seed Coat Breakage (%)	Powdery Mildew	Seed Coat Dimpling
AC™ Agassiz	107	116	112	Medium	85	4.5	230	Good	R	Fair
CDC Golden	100	100	100	Medium	75	4.5	230	Good	R	Good
AAC Lacombe	111	127	--	Medium	85	3.5	250	Fair	R	Fair

Lodging Score: 1 – completely upright, 9 – completely lodged
 Seed Coat Dimpling: VG = 0-5%; G = 6-20%; F=21-50%
