

# PS 0035 NR2

## RELATIVE MATURITY

Maturity .....2000-2450 CHU  
 Relative maturity group .....00.3

## KEY FEATURES

- ✓ Genuity® Roundup Ready 2 Yield® soybean variety from PRIDE Seeds
- ✓ Can be planted in all row widths
- ✓ SCN resistance with above average IDC (iron deficiency chlorosis) and stress tolerance
- ✓ Roundup Ready® *crop safety yield advantage*

## VARIETY CHARACTERISTICS

Hilum Colour ..... Black  
 Pubescence ..... Tawny  
 Seeds/kg ..... 4400-5400  
 Plant Height..... Medium  
 Canopy ..... Medium Bushy  
 Phytophthora:  
 Resistance Gene..... None  
 Field Tolerance..... N/A

## AGRONOMIC RATINGS

Emergence..... Very Good  
 Standability ..... Very Good  
 White Mould..... Very Good  
 Sudden Death Syndrome.....Very Good  
 Iron Deficiency Chlorosis....Medium Tolerant  
 No-Till..... Excellent  
 Row width: Preferred ..... 7"-15"

Note:

Seeds/kg rating is an average depending on seasonal production. Refer to seed tag.  
 Ratings based on PRIDE Seeds observations and may not predict future results.

## SEEDING RATE SUGGESTIONS (in 1,000's of seeds/ac)

- For untreated soybeans use the upper end of the suggested range.
- For fields with history of white mould use lower end of suggested range.  
 Your PRIDE Seeds representative can help you position the best product for your operation.
