

PS 0074 R2

RELATIVE MATURITY

Maturity 2300-2550 CHU
Relative maturity group 00.8

KEY FEATURES

- ✓ Genuity® Roundup Ready 2Yield® soybean variety
- ✓ High yielding variety with very good standability
- ✓ Roundup Ready® *crop safety yield advantage*
- ✓ Excellent iron deficiency chlorosis tolerance
- ✓ This product offers exceptional yield potential, very good field tolerance against Phytophthora

VARIETY CHARACTERISTICS

Hilum Colour Brown
 Pubescence Tawny
 Seeds/kg 6000-7000
 Plant Height Medium
 Canopy Medium Bushy
 Phytophthora:
 Resistance Gene None
 Field Tolerance Very Good

AGRONOMIC RATINGS

Emergence Very Good
 Standability Very Good
 White Mould Good
 Sudden Death Syndrome Very Good
 Iron Deficiency Chlorosis Tolerant
 No-Till Excellent
 Row width: Preferred 15"-30"

Note:

Seeds/kg rating is an average depending on seasonal production. Refer to seed tag.
Ratings based on PRIDE Seeds observations and may not predict future results.

SEEDING RATE SUGGESTIONS (in 1,000's of seeds/ac)

- For untreated soybeans use the upper end of the suggested range.
- For fields with history of white mould use lower end of suggested range.
