AAC Cameron VB

CWRS

- Higher yielding (106% in SK) than Unity VB with significantly better lodging resistance
- Resistance to orange blossom wheat midge
- Varietal blend with Carberry for midge-susceptible refuge
- Improved FHB resistance
- Resistance to leaf and stem rust
- Awned

AAC Connery

CWRS

- Broad adaptation
- Semi-dwarf stature – suitable for intensive management
- Improved FHB rating
- Holds its colour and grade
- Awnless

Thorsby

CWRS

- Early maturity without sacrificing yield potential
- Bred at the University of Alberta
- Broad geographic fit
- R to stripe rust
- Awnless

AAC Concord NEW

CNHR

- Available for 2018 planting
- Resistant to wheat stem sawfly (solid stem)
- Among the few milling wheats with triple R resistance to rusts
- 20% higher yielding than Lillian with stronger FHB resistance
- High test weight and seed weight
- Awnless

AAC Crossfield NEW

CPSR

- Available for 2018 planting
- Higher yield than current commercial varieties
- Low DON accumulation
- Short, strong straw suitable for irrigation
- High protein content and improved milling and baking quality

AAC Congress NEW

CWAD

- Available for 2018 planting
- Higher yield than current commercial varieties
- Low DON accumulation
- Low semolina ash and grain cadmium content
- High pigment concentration
- Awned

AC™ Emerson

CWRW

- Rated R, the best FHB rating on the market!
- Similar yield to CDC Falcon
- Improved winter hardiness over CDC Falcon and Flourish
- Medium maturity
- Resistance to stem and stripe rust
