

CDC 6928 Small Red Lentil

Overview:

CDC 6928 is a small red lentil that shows very good yield potential, similar to the current leading varieties and significantly higher than the check variety CDC Maxim (109%). Its agronomy features and disease resistance are similar to the check.

Features:

- High yield potential (109 % of CDC Maxim)
- Seed size similar to CDC Simmie and slightly smaller than CDC Maxim
- Maturity similar to the checks
- Imidazolinone tolerance

Two-year agronomy performance data from the Coop registration trials (2020 – 2021)

Variety	Yield % CDC Maxim	Mat days	Lodging (1-9)	Seed Weight Mg	Plant height cm	Ascochyta (%)	Anthracnose Race 1 (%)	Anthracnose Race 0 (%)
CDC 6928	109	98	2.3	38	41	37.2	81	86.5
CDC Maxim	100	98	1.4	41	39	31.5	79	88.5
