

A5092

Conventional Grain Corn

Strong agronomics with early flowering and late-season stalk strength

- Features early flowering and finish
- Consistent long ear length with deep kernels
- Easily adapts to all environments including stress soils
- Exceptional late season stalk strength and intactness

OVERALL CHARACTERISTICS

CHU	2450
Days to Maturity	81
Spring Vigour	Very Good
Drought Tolerance	Excellent
Drydown	Excellent
Stalk Strength	Excellent
Root Strength	Excellent
Test Weight	Excellent
Flowering	Early
Plant Height	Medium Tall
Ear Height	Medium
Staygreen	Very Good
Ear Type	Fixed
Kernel Rows	14-16
Harvest Timing	Flexible
Final Population (000s per ac)	34-38
