

# AAC Donlow

## Canada Western Amber Durum

Best FHB resistance in its class and high yield with improved standability

- Excellent yield performance against check varieties
- Best FHB resistance in its class with low DON accumulation
- Short stature with excellent standability
- Great disease resistance package, R to all rusts

## YIELD PERFORMANCE

## OVERALL CHARACTERISTICS

<b>Maturity</b>	Early
<b>Height</b>	Short
<b>Growing Zone</b>	Durum areas of AB and SK
<b>Lodging Resistance</b>	Very Good
<b>FHB Resistance</b>	MS*
<b>Stripe Rust Resistance</b>	R
<b>Leaf Rust Resistance</b>	R
<b>Stem Rust Resistance</b>	R

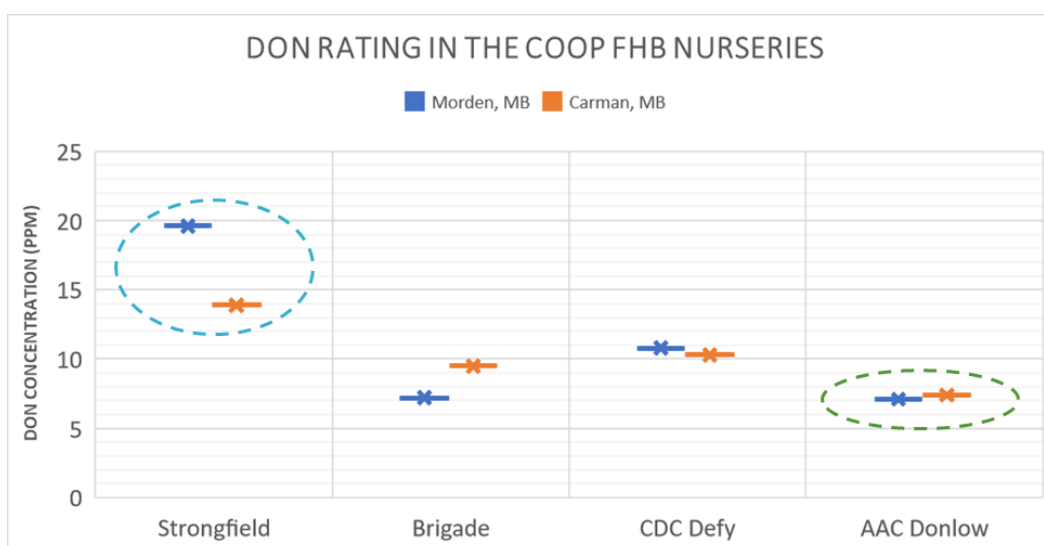

# AAC Donlow

## Technical Information

### SK Varieties of Grain Crops - 2021

Variety	Yield % Strongfield		% Protein	Lodging	Stem Rust	Leaf Rust	Stripe Rust	FHB*	Maturity (days)	Head Awne	Height (cm)
	Area 1 & 2	Area 3 & 4									
AAC Donlow	110	107	13.6	F	R	R	R	MS*	+1	Y	0
AAC Stronghold	101	100	14.0	VG	R	R	MR	MS	+2	Y	-3
CDC Defy	111	111	13.4	G	MR	R	I	MS*	0	Y	+4

\*AAC Donlow and CDC Defy generally express lower FHB symptoms compared to other cultivars in the class

**Origin:** Agriculture and Agri-Food Canada, Swift Current  
**Pedigree:** DT839/Transcend
