

NEW AS1017RR EDF

Effective Digestible Fibre (EDF) Silage Corn

New introductory early silage, high moisture corn for the shorter season growing areas

- Slow grain drying rate preserves reliable and consistent feed quality at ideal moisture content
- Strong emergence and aggressive spring vigour
- Tall, uniform plant height with consistent ear size producing flint kernels on white cob

OVERALL CHARACTERISTICS

Silage CHU	2050 - 2250
Silage Yield	Very Good
Plant Height	Tall
Milk/Tonne	Very Good
Milk/Acre	Very Good
% Total Digestible Nutrients	Very Good
% Starch	Very Good
% Crude Protein	Very Good
Flowering	Late
Emergence	Excellent
Spring Vigour	Very Good
Stalk Strength	Excellent
Root Strength	Excellent
Staygreen	Excellent
Drought Tolerance	Very Good
Ear Type	Fixed
Milk or Beef Tonne	Very Good
