

CANTERRA SEEDS

2027 SEED GUIDE

CANOLA | WHEAT | OATS | BARLEY | PULSES | SPECIALTY

GROWING CONNECTION

ONE FIELD AT A TIME

We're CANTERRA SEEDS — we exist to make a difference in agriculture by providing Western Canadian farmers with the best seed solutions and unparalleled customer service.

We are proud to support farmers and seed retailers not just as business partners, but as fellow community members who understand the value of hard work, dedication, and building meaningful connections.

CANOLA

With a lineup that fits every
acre, CANTERRA SEEDS offers
herbicide-tolerant canola
to fit your rotation.

CANOLA THAT FITS EVERY ACRE

CLEARFIELD® CANOLA

CS2800 CL

CANTERRA SEEDS offers herbicide-tolerant canola hybrids on three major trait platforms. Find the right agronomic mix for your farm with: high yields, PodProtect™ pod shatter protection, superior disease protection and choice of seed treatments.

RELATIVE MATURITY SCALE

- LibertyLink® Canola
- TruFlex® Canola
- Clearfield® Canola

LOOK FOR OUR YIELD STAMP!

CANTERRA SEEDS' canola hybrids offer the traits you want and genetics you need. Look for these Yield Stamps to identify canola hybrids that provide extra protection to maximize your canola yield.

PodProtect™

Hybrids with the PodProtect™ Yield Stamp offer enhanced protection against pod shatter with our PodProtect™ trait, designed for superior straight cut performance.

Straight Cut

Look for the Straight Cut Yield Stamp for products suitable for delayed swathing or straight cutting, based on timing and harvest conditions. These hybrids were bred to have increased shatter tolerance.

Clubroot

All CANTERRA SEEDS canola hybrids have clubroot protection. Products with the Clubroot Yield Stamp have additional genes to protect against clubroot in high-risk zones.

Blackleg

All CANTERRA SEEDS canola hybrids have blackleg protection. For resistance to multiple races of blackleg, look for our Blackleg Yield Stamp.

CANOLA SHATTER RATINGS

Relative shatter performance

Disclaimer: Canola pod shatter ratings are based on the Canola Council of Canada Canola Shatter Ratings scale where Pioneer 45H33 is rated a 4 and InVigor L255PC is rated an 8. The scale indicates relative shatter ratings compared to checks and is not an indication of percent shatter. Shatter ratings are subject to change and experiences will vary based on unique farming practices and local environmental conditions.

CLUBROOT

Clubroot is a serious soil-borne disease that threatens canola yield. **CANTERRA SEEDS offers canola hybrids with strong, targeted resistance to the most prevalent pathotypes.** By focusing on pathotypes that matter most, we help you choose the right hybrid for your farm – whether you're in a low- or high-pressure zone – to slow spore buildup and protect your yield.

1st Generation Resistance

Suitable for fields where there is no known clubroot infection, low spore load or where 1st generation genetics are working. Suitable for most areas of the Prairies.

2nd Generation Resistance

Choose a hybrid with 2nd generation resistance where resistance-breaking pathotypes are found and where 1st generation resistance is showing symptoms.

CEREALS

Pure, premium-quality seed,
produced under the highest
standards to meet the demands
of farmers and end users.

HOMEGROWN WHEAT. BUILT FOR HERE.

Through our joint venture with Limagrain Cereals Research Canada (LCRC), CANTERRA SEEDS is investing in Canadian breeding to deliver wheat varieties made for Western Canadian farms — and it's paying off.

- Bred for local conditions
- Built for performance
- Backed by Canadian investment

VUA Seed purchases are subject to a Variety Use Agreement.
Learn more at: seeds-canada.ca/variety-use-agreement

- CS Recoil - CPSR **VUA**

SCAN TO LEARN MORE

Limagrain Cereals Research Canada (LCRC) is the largest Hard Red Spring wheat breeding program in North America. Local performance is best predicted by local data.

VUA: Powering Innovation

— PAY AS YOU GROW —

WHAT IS A VUA?

The Variety Use Agreement, or VUA, is a contract-based system that allows farmers to invest directly into plant breeding by compensating the breeder for each use of seed.

WHY A VUA? REINVEST INTO CONTINUED IMPROVEMENTS...

Growing a VUA variety ensures reinvestment back into the improvement of future seed varieties. It is a fair system where farmers and breeders both benefit from genetics with improved performance.

WITH A VUA

- Breeders are fairly compensated
- More investment in improved genetics

WITHOUT A VUA

- No compensation for the breeder
- No investment in future genetics

WHEAT

	SV6139GR 	High pods and good lodging resistance combine for great yields	E	2a	335	S
	Windbreaker	A perfect fit for Manitoba dry bean growing areas	M	2a	378	S

Maturity, growth habit, TKW and disease rating reflect MB Pulse Growers Trials and/or official registration data. *TKW = Thousand Kernel Weight.

Growth habit: 1 = determinate bush, 2a = indeterminate bush without guides.

FLAX

	VARIETY	DESCRIPTION	Maturity	Height	Lodging	Iodine Value	Seed Size	Fusarium Wilt
Oilseed	CDC Neela 	A flax with significant yield improvements	L	+2	G	198.3	M	MR

Agronomic and disease rating reflect provincial seed guide and/or official registration data. Height cm +/- CDC Bethune.

CANARY SEED

	VARIETY	DESCRIPTION	Days to Head	Days to Maturity	Height	Test Weight	TKW*
Glabrous	NEW CDC Alba 	Highest yielding glabrous variety with early maturity and shorter stature	0	0	-11	70.5	8.0
	CDC Lumio 	Very high-yielding potential with great seed quality attributes	+2	+1	+3	70.2	8.4
	CDC Cibo 	The first yellow-groated variety	0	-1	-9	70.4	8.2
	CDC Calvi 	Boasts a tremendous yield improvement	+2	+3	+4	71.5	8.3

Agronomic and disease ratings reflect provincial seed guide compared to CDC Maria.
Height cm +/- CDC Maria. Test Weight lb/bu. *TKW = Thousand Kernel Weight.

For 30 years, CANTERRA SEEDS has remained closely connected to the communities we serve. Through the Rooted in the Prairies Project, we've contributed **over \$1 million** in the past five years, supporting local initiatives across Western Canada.

Bayer is a member of Excellence Through Stewardship® (ETS).

Bayer products are commercialized in accordance with ETS Product Launch Stewardship Guidance, and in compliance with Bayer's Policy for Commercialization of Biotechnology-Derived Plant Products in Commodity Crops. These products have been approved for import into key export markets with functioning regulatory systems. Any crop or material produced from these products can only be exported to, or used, processed or sold in countries where all necessary regulatory approvals have been granted. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for these products. Excellence Through Stewardship® is a registered trademark of Excellence Through Stewardship.

ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. TruFlex® canola contains Roundup Ready® Technology. Roundup Ready® Technology contains genes that confer tolerance to glyphosate. Glyphosate will kill crops that are not tolerant to glyphosate. Roundup Ready®, TruFlex® and BUTEO® are registered trademarks of Bayer Group. Used under license. Bayer CropScience Inc. is a member of CropLife Canada. ©2026 Bayer Group. All rights reserved

LibertyLink® and the Water Droplet Design are registered trademarks of BASF. Used under license.

Clearfield® and the unique Clearfield symbol are registered trademarks of BASF Agrochemical Products B.V.; used with permission by BASF Canada Inc.

All other trademarks are the property of their respective owners.

CANTERRA SEEDS is a member of Cleanfarms

CANTERRA SEEDS users can bring their seed bags to a Cleanfarms collection site partner across Canada.
