

## CDC Cibo

### Canary seed

The first yellow-groated canary seed variety on the market.

- High yields (106% of CDC Bastia)
- Early maturity compared to current commercial varieties
- Good disease resistance package
- Approved for human consumption by Health Canada and the US Food and Drug Administration

### YIELD PERFORMANCE

CDC Cibo	106%
CDC Bastia	100%

### OVERALL CHARACTERISTICS

Maturity	Early
Height	Short
Growing Zone	All canaryseed growing areas (SK)
Lodging Resistance	Good
Test Weight	70.3 kg/hl
Thousand Kernel Weight	8.3 g
Seed Coat Color / Appearance	Yellow / Glabrous

# CDC Cibo

## Technical Information
