## 2025 SEED GUIDE

**WE ARE A CANADIAN COMPANY CREATED BY FARMERS, FOR FARMERS, AND  
WE ARE 100% COMMITTED TO SEED.**

**WE INVEST**

in local performance testing  
to provide top-performing  
products demanded by  
farmers and end users.

**WE PRODUCE**

a diverse portfolio of  
top-quality field crop seed.

**WE GROW**

through strategic  
partnerships, and a  
commitment to our  
farmer-owned roots.

CANOLA

# CANOLA

With a lineup that fits every acre, CANTERRA SEEDS offers herbicide-tolerant canola to fit your rotation.

- TruFlex® Canola
- Clearfield® Canola

# LOOK FOR OUR YIELD STAMP!

CANTERRA SEEDS' canola hybrids offer the traits you want and genetics you need. Look for these Yield Stamps to identify canola hybrids that provide extra protection to maximize your canola yield.

NEW

## **PodProtect™**

Hybrids with the PodProtect™ Yield Stamp offer enhanced protection against pod shatter with our PodProtect™ trait, designed for superior straight cut performance.

## **Straight Cut**

Look for the Straight Cut Yield Stamp for products suitable for delayed swathing or straight cutting, based on timing and harvest conditions. These hybrids were bred to have increased shatter tolerance.

## **Clubroot**

All CANTERRA SEEDS canola hybrids have clubroot protection. Products with the Clubroot Yield Stamp have additional genes to protect against clubroot in high-risk zones.

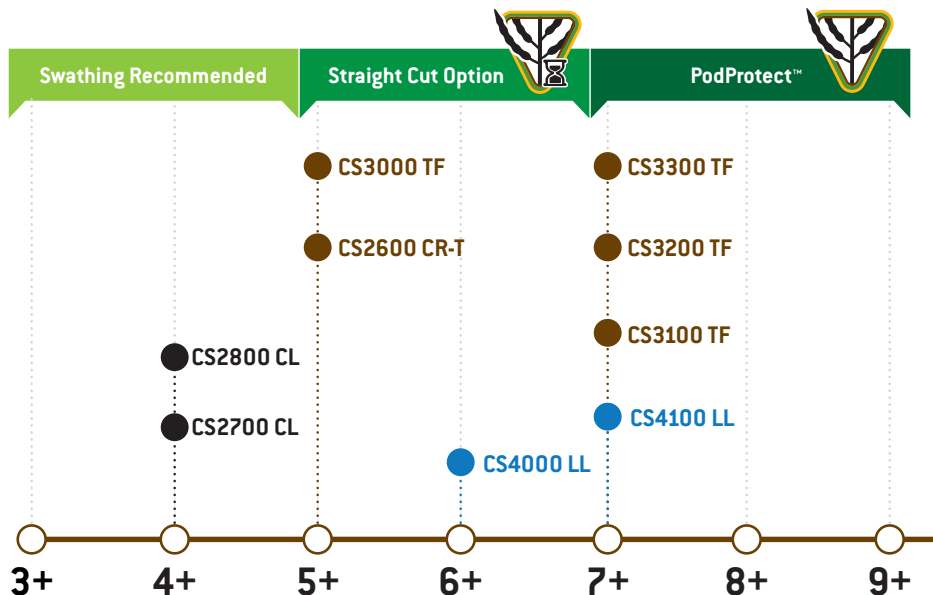

## **Blackleg**

All CANTERRA SEEDS canola hybrids have blackleg protection. For resistance to multiple races of blackleg, look for our Blackleg Yield Stamp.

# CANOLA SHATTER RATINGS

Relative shatter performance

Disclaimer: Canola shatter ratings are based on the Canola Council of Canada Canola Shatter Ratings scale where Pioneer 45H33 is rated a 4 and InVigor L255PC is rated an 8. The scale indicates relative shatter ratings compared to checks and is not an indication of percent shatter. Shatter ratings are subject to change and experiences will vary based on unique farming practices and local environmental conditions.

# LIMAGRAIN CEREALS RESEARCH CANADA

Limagrain Cereals Research Canada (LCRC) is the largest Hard Red Spring wheat breeding program in North America, and has one of the most extensive local networks working with wheat, barley and pulses. Local performance is best predicted by local data.

## RAPID BREEDING

Rapid generation advancements gives LCRC the ability to breed new varieties faster.

## ADVANCED TECHNOLOGY

LCRC uses molecular data with advanced statistical tools to find and control key disease/insect resistance, agronomic and functional quality traits.

## GARNERING SUCCESS

In 2024, LCRC received support on seven wheat varieties from the Prairie Grain Development Committee – a huge accomplishment. CANTERRA SEEDS has first right of refusal on all LCRC's wheat varieties, so watch for new, top-performing products coming soon!

Limagrain Cereals Research Canada (LCRC)  
is a joint venture of CANTERRA SEEDS and Limagrain.

	CS Tracker 	An awnless early maturity variety with excellent rust resistance, suited to a broad geography	E	+5	VG	I	R	R	R
	AAC Cameron VB  	A very high-yielding midge tolerant variety with lowest FHB symptoms and DON accumulation of all wheat varieties	M	+13	VG	I	S	MR	MR
	AAC Connery 	An awnless variety that combines early maturity with the benefits of short, strong straw and high protein	E	+3	VG	MR	R	MR	R
	Thorsby 	An awnless variety with early maturity and rust resistance, suited to a broad geography	E	+13	G	I	R	R	MR

## SYMBOLS

Agronomic and disease ratings reflect provincial seed guide and/or official registration data.

Height cm +/- AAC Brandon (CWRS & CPSR), Strongfield (CWAD) and CDC Buteo (CWRW)

These varieties are protected by Plant Breeder's Rights. Learn more at: [pbrfacts.ca](http://pbrfacts.ca)

Seed purchases are subject to a Variety Use Agreement. Learn more at: [seeds-canada.ca/variety-use-agreement](http://seeds-canada.ca/variety-use-agreement)

Varieties containing the herbicide trait are subject to a Stewardship agreement

These varieties have been bred and tested by Limagrain Cereals Research Canada (LCRC)

Variety accepted in the Warburton's Canadian Identity Preserved Program (IP Program)

Midge tolerant wheat variety

## CS Daybreak

### Canada Western Red Spring

A high-yielding CWRS variety with a strong disease resistance package, best adapted for the eastern Prairies

- High grain yield (better than AAC Viewfield)
- Good maturity (similar to Carberry)
- Good protein content (similar to AAC Viewfield)
- Excellent rust package (R to stem rust, MR to leaf and stripe rust) and good FHB resistance (I)
- Good milling and functional quality

### YIELD PERFORMANCE

CS Daybreak

AAC Viewfield

The value represents the average number observed during the three years of LCRC registration trials

## CS Jake

### Canada Western Red Spring

An early-maturing variety with excellent stripe rust protection and higher protein content

- High-yielding potential with improved protein content over current varieties
- Very early, similar to AAC Redwater [-4.2 days vs. AAC Brandon]
- Excellent candidate for the short growing regions in the Parkland areas

### QUALITY PERFORMANCE (PROTEIN)

Seed Guides are used as sources for performance

## CS Tracker

### Canada Western Red Spring

An awnless early maturity variety with excellent rust resistance, suited to a broad geography

- High-yielding potential with improved protein content over current varieties
- Early, similar to AAC Redwater [-4 days vs. AAC Brandon]
- Broad adaptability due to its excellent overall disease resistance

### MATURITY PERFORMANCE (+/- 99 DAYS)

Seed Guides are used as sources for performance

# AAC Cameron VB

## Canada Western Red Spring

One of the highest yielding CWRS for the past five years across the Prairies. As most midge tolerant varieties, it has a taller stature. However, its strong straw offers good lodging resistance

- Very high grain yield every year
- Best FHB resistance and lowest DON content in its class
- Excellent milling and functional quality
- Variety blend with Carberry

## YIELD PERFORMANCE

AAC Cameron VB

104%

AAC Wheatland VB

100%

Seed Guides are used as sources for performance. SK Seed Guide, Area 3 & 4

**Before**

Wheat harvest prior to Midge Tolerant Wheat circa 1983

**After**

Wheat harvest with Midge Tolerant Wheat circa 2023

**Remember wheat midge damage?**

Before Midge Tolerant Wheat, harvest could get ugly. Let's not go back to the days of dockage and yield loss.

**Sign the agreement and protect the one and only Midge Tolerant Wheat gene.**

There is **NO Plan B**

[midgetolerantwheat.ca](http://midgetolerantwheat.ca)

# WHEAT

	VARIETY	DESCRIPTION	Maturity	Height	Lodging	FHB	Stripe Rust	Leaf Rust	Stem Rust
CPSR	CS Accelerate  VUA	Very high yield with shorter straw; improved milling quality	M	-3	G	I	R	R	R
	AAC Crossfield 	A desirable combination of high yield, short, strong straw and early maturity; suitable for high inputs and irrigation	M	0	VG	I	R	R	R
CWAD	AAC Donlow 	Lowest DON accumulation in its class with high yield potential and improved standability	M	0	VG	MS*	R	R	R
	CDC Credence 	High-yielding with excellent quality profile, a high yellow pigment concentration and lower FHB symptoms	M	+7	VG	MS*	R	R	R
	AAC Congress 	A high-yielding durum wheat with superior end-use quality and consistent yields	M	+3	G	MS	R	MR	R
CWRW	AC™ Emerson 	A game changer with first R-rating FHB resistance	M	-5	VG	R	R	I	R
	AC™ Radiant 	A top variety for many years	L	-1	VG	S	MS	S	S

\*These varieties generally express lower FHB symptoms and/or DON accumulation compared to other MS rated cultivars.

# PLANTED BY PROS

## CS ACCELERATE

CANADA PRAIRIE SPRING RED 

An early maturing, very high-yielding semi-dwarf CPSR wheat with excellent rust resistance package and improved milling quality.

CS Accelerate is just one of many varieties to come from Limagrain Cereals Research Canada.

- ✓ High grain yield
- ✓ Early maturity
- ✓ Excellent rust package
- ✓ Short, strong straw
- ✓ Part of the Warburtons program

# CS Accelerate

## Canada Prairie Spring Red

An early maturing, very high-yielding semi-dwarf CPSR wheat with excellent rust resistance package and improved milling quality

- High grain yield (108% of AAC Penhold)
- Early maturity (-1d of AAC Foray)
- Short, strong straw (-10cm of AAC Foray)
- Excellent rust package (R to leaf, stem and stripe rust) and good FHB resistance (I)
- Good milling and functional quality
- Part of the Warburtons program

### YIELD PERFORMANCE

The value represents the average number observed during the three years of LCRC trial evaluation

# AAC Donlow

## Canada Western Amber Durum

Great FHB resistance with lowest DON accumulation, high-yielding potential and excellent standability

- Superior FHB resistance and lower DON accumulation
- Excellent and consistent yield performance
- Short, strong straw with excellent standability
- Great disease resistance package (R to all rusts)

### YIELD PERFORMANCE

Seed Guides are used as sources for performance

## CDC Credence

### Canada Western Amber Durum

High-yielding, high quality and early maturing durum with good FHB resistance and low DON accumulation

- Excellent yield performance against current varieties
- Good FHB resistance and low DON accumulation
- Superior quality performance, with very high pigment concentration

### YIELD PERFORMANCE

Seed Guides are used as sources for performance

## AAC Congress

### Canada Western Amber Durum

Consistent high yields and broad adaptability in any growing situation, both dryland and irrigated

- Excellent, consistent yield across multiple geographies
- Excellent straw strength
- Superior quality performance, with high pigment concentration

### YIELD PERFORMANCE

Seed Guides are used as sources for performance. SK Seed Guide Irrigation

# WINTER TRITICALE

# AAC Connect

## 2-Row Malting Barley

A top-performing variety with growing demand on the Recommended Malting Barley Varieties List by the Canadian Malting Barley Technical Centre (CMBTC)

- Excellent malt quality with higher malt extract and friability
- Short, strong straw
- Heavier and plumper kernels
- Best FHB resistance in its class

### YIELD PERFORMANCE

Seed Guides are used as sources for performance

# AAC Prairie

## 2-Row Malting Barley

The highest enzyme activity since AC Metcalfe, suitable for adjunct brewing

- Great malting profile with high-enzyme activity
- Short, strong straw
- Good yield potential
- Excellent disease resistance package
- On the CMBTC list: "variety in development"

### YIELD PERFORMANCE

Coop trial data is used as source for performance

NEW

## AB Wrangler

### 2-Row Feed and Forage Barley

Very high-yielding feed and forage barley with best FHB protection and excellent standability

- High-yielding potential for grain and forage
- Best FHB protection in its class and low DON accumulation
- Excellent silage nutritional quality
- Great versatility being suitable for all forage and silage growing areas

#### YIELD PERFORMANCE

Seed Guides are used as sources for performance

## Canmore

### 2-Row Feed Barley

High-yielding feed barley with shorter stature and excellent disease resistance package

- Consistent performer under dry conditions and high moisture environments alike
- Very heavy barley (high test weight) with excellent feed conversion numbers
- Better straw strength than leading variety in the class

#### HEIGHT (CM)

Seed Guides are used as sources for performance

	VARIETY	DESCRIPTION	Maturity	Pre-Harvest Lodging	Vine Length	Seed Shape	Seed Coat Breakage	TKW*
Yellow	AAC Carver 	The perfect package yellow pea	E	VG	L	Round	VG	240
	 AAC Beyond 	The NEW perfect pea package: high yield and high protein content	E	G	M	Round	F	215
	 CS ProStar 	Next-generation yellow pea: very high protein content variety without compromising yield or maturity	E	G	M	Round	VG	240
	 CDC 5791  <b>VUA</b>	A balanced pea with excellent yield potential and high protein content	M	G	L	Round	VG	246

Agronomic and disease ratings reflect provincial seed guide and/or official registration data.

\*TKW = Thousand Kernel Weight.

## AAC Carver

### Yellow Pea

The perfect pea package: high-yielding and early maturity

- Very high yields
- Early maturity
- Suitable for all pea growing areas
- Large seed size and easy handling at harvest

### YIELD PERFORMANCE

Seed Guides are used as sources for performance

## AAC Beyond

### Yellow Pea

The NEW perfect pea package: high-yielding and early maturity plus higher protein content

- Very high yields
- High protein content
- Early maturity

### YIELD PERFORMANCE

2018-2019 Coop data is used as source for performance

COMING  
SOON

# CS ProStar

31

## Yellow Pea

Very high protein content without compromising yield

- Very high protein content
- High yield potential
- Early maturity
- Very low seed coat breakage

## PROTEIN CONTENT

2020-2021 Coop data is used as source for performance

# LENTILS

	VARIETY	DESCRIPTION	Maturity	Lodging	Height	TKW*	Imi. Tolerance
Small Red	 CDC 6928  VUA	A new small red lentil with good yield potential	M	VG	+2	38	Y
	 CDC 6956  VUA	A new small red lentil with good yield potential and larger seed size	M	G	+2	48	Y

Height cm +/- CDC Maxim \*TKW = Thousand Kernel Weight.

COMING  
SOON

## CDC 6928

### Small Red Lentil

A small red lentil with high yield potential

- High yield potential (109% CDC Maxim)
- Maturity similar to the check
- Seed size similar to CDC Simmie
- Imidazolinone tolerance

### YIELD PERFORMANCE

Registration data was used for performance

COMING  
SOON

## CDC 6956

### Small Red Lentil

A small red lentil with good yield potential and larger seed size

- High yield potential (108% CDC Maxim)
- Maturity similar to the check
- Larger seed size
- Imidazolinone tolerance

### YIELD PERFORMANCE

Registration data was used for performance

# EDIBLE BEANS

	VARIETY	DESCRIPTION	Maturity	Growth Habit	TKW*	Anthraco
Pinto	ND Palomino  VUA	A pinto variety with high-yield potential and the desirable slow-darkening trait, sought after by end users	L	2a	387	S
	SV6139GR 	High pods and good lodging resistance combine for great yields	E	2a	335	S
	Windbreaker	A perfect fit for Manitoba dry bean-growing areas	M	2a	378	S

Maturity, growth habit, TKW and disease rating reflect MB Pulse Growers Trials and/or official registration data. \*TKW = Thousand Kernel Weight.  
 Growth habit: 1 = determinate bush, 2a = indeterminate bush without guides.

# FLAX

	VARIETY	DESCRIPTION	Maturity	Height	Lodging	Iodine Value	Seed Size	Fusarium Wilt
Oilseed	CDC Neela 	A flax with significant yield improvements	L	+2	G	198.3	M	MR
	AC™ Prairie Thunder 	Excellent agronomic package	M	-8	VG	194.7	M	MR

Agronomic and disease rating reflect provincial seed guide and/or official registration data. Height cm +/- CDC Bethune.

# CDC Neela

## Flax

An excellent variety with significant yield improvement over the current varieties

- High yields
- Excellent quality
- Good disease resistance package

## YIELD PERFORMANCE

Seed Guides are used as sources for performance

# CANARY SEED

	VARIETY	DESCRIPTION	Days to Head	Days to Maturity	Height	Test Weight	TKW*
Glabrous	CDC Lumio 	Very high-yielding potential with great seed quality attributes	+2	+1	+3	70.2	8.4
	CDC Cibo 	The first yellow-groated variety	0	-1	-9	70.4	8.2
	CDC Calvi 	Boasts a tremendous yield improvement	+2	+3	+4	71.5	8.3

Agronomic and disease ratings reflect provincial seed guide compared to CDC Maria. Height cm +/- CDC Maria. Test Weight lb/bu. \*TKW = Thousand Kernel Weight.

# IN THE HANDS OF A PRO

Our extensive field seed portfolio is rooted in the Prairies, with investments in Canadian plant breeding supported by access to the world's best genetics and traits.

**CANTERRA SEEDS, PLANTED BY PROS.**

CANOLA | WHEAT | OATS | BARLEY | PULSES | SPECIAL CROPS

**CANTERRA SEEDS** is deeply rooted in the Prairies and offers one of the broadest field crop seed portfolios in Western Canada. Partnerships, innovation and a large, local trial network drive our commitment to top-quality seed for every farmer.

But it's not just about seed; **CANTERRA SEEDS** is dedicated to improving local communities through programs like our Rooted in the Prairies Project, and supports our passionate team who work tirelessly to ensure success for our customers.

## **CANTERRA SEEDS is a member of Cleanfarms.**

Cleanfarms is a non-profit environmental stewardship organization, who works collaboratively with various partners across the agricultural value chain to ensure that Canadian farmers can actively contribute to a healthy environment and a sustainable future. Their programs offer a tangible way to address agricultural waste management in the community.

CANTERRA SEEDS users can bring their seed bags to a Cleanfarms collection site partner across Canada.

**Bayer is a member of Excellence Through Stewardship® (ETS).** Bayer products are commercialized in accordance with ETS Product Launch Stewardship Guidance, and in compliance with Bayer's Policy for Commercialization of Biotechnology-Derived Plant Products in Commodity Crops. These products have been approved for import into key export markets with functioning regulatory systems. Any crop or material produced from these products can only be exported to, or used, processed or sold in countries where all necessary regulatory approvals have been granted. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for these products. Excellence Through Stewardship® is a registered trademark of Excellence Through Stewardship.

**ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS.** TruFlex® canola contains Roundup Ready® Technology. Roundup Ready® Technology contains genes that confer tolerance to glyphosate.

Glyphosate will kill crops that are not tolerant to glyphosate. Roundup Ready® and TruFlex® are registered trademarks of Bayer Group. Used under license. Bayer CropScience Inc. is a member of CropLife Canada.

Always read and follow label directions. Fortenza® Advanced is an on-seed application of Fortenza Seed Treatment insecticide and Rascendo® Seed Treatment insecticide. Helix® Saltro® is an on-seed application of Helix Vibrance® Seed Treatment insecticide/fungicide and Saltro® Seed Treatment fungicide. Fortenza®, Helix®, Pelta™, Rascendo®, Saltro®, Vibrance®, the Alliance Frame, the Purpose Icon and the Syngenta logo are trademarks of a Syngenta Group Company. © 2025 Syngenta.
