Management tips — these ratings are well handled with standard practices and don't take away from the variety's value

- **Scald (S):** rotation and a foliar fungicide at flag leaf in wet seasons
- **Loose smut (S):** a systemic seed treatment gives effective control

Yield vs CDC Copeland by province

Saskatchewan = average of Areas 1 & 2 and 3 & 4; Alberta = overall yield category; Manitoba = % of the check in Seed Manitoba.
