

Seed the Difference.™

# Product Guide 2020

**PRIDE SEEDS**

**We are a Canadian company created by farmers,  
for farmers, and we are 100% committed to seed.**

## **WE INVEST**

locally in plant breeding  
and access a global network of  
germplasm and traits.

## **WE PRODUCE**

a diverse portfolio of  
top-quality field crop seed.

## **WE GROW**

through strategic partnerships,  
and a commitment to our  
farmer-owned roots.

## BONUS REWARDS OVERVIEW

Germinating Success™ rewards farmers who support  
CANTERRA SEEDS' full portfolio of products on their farm.

**BUY A QUARTER**  
( 160 ACRES )

### CANTERRA SEEDS CANOLA

*and receive*

**\$1.50**acre | reward on  
your canola

### PRIDE Seeds CORN

*and receive*

**\$1.50**acre | reward on  
your corn

## BUY A HALF (320 ACRES)

### CANTERRA SEEDS CANOLA or PRIDE Seeds CORN

*and receive*

**\$3.00**acre | reward on your  
**CANTERRA SEEDS**  
canola

*and receive*

**\$3.00**acre | reward on your  
**PRIDE Seeds**  
corn

*and receive*

**\$1.00**acre | reward on your  
**PRIDE Seeds**  
soybeans

*and receive*

**\$0.25**acre | reward on your  
**CANTERRA SEEDS**  
pedigreed seed

— To participate, farmers must sign up online at [CANTERRA.COM](https://CANTERRA.COM) —

\*Offer valid on eligible CANTERRA SEEDS and PRIDE Seeds products only. Products may be purchased from any CANTERRA SEEDS retail partner. Visit [CANTERRA.com](https://CANTERRA.com) for full details, including acreage conversion rates.

## REAP EVEN MORE REWARDS!

CANTERRA SEEDS products are eligible for the BayerValue™ program and may be purchased from any one of CANTERRA SEEDS' retailer partners.

---

Grower must sign up for the BayerValue Program at [CropScience.Bayer.ca/BayerValue](https://CropScience.Bayer.ca/BayerValue). BayerValue™ is a trademark of Bayer Group.

# CANOLA

CS2400

## Early Season Value Option with Multigenic Blackleg Resistance

- 2-3 days earlier than CS2000
- Multigenic blackleg resistance: R-CX
- Straight-cut option

### Performance

Dealer Trial Results (n=3)

CS2300

## Reach New Heights in Yield!

- Superior yield potential – better than 75-65 RR
- Big pods
- Excellent lodging resistance

### Performance

Canola Performance Trials (n=18)

#### SYMBOLS USED

**EXC** Excellent  
**VG** Very Good  
**G** Good  
**F** Fair

**P** Poor  
**R** Resistant  
**MR** Moderately Resistant

**I** Intermediate  
**MS** Moderately Susceptible  
**S** Susceptible

**VE** Very Early  
**E** Early  
**M** Medium  
**L** Late

# CANOLA

CS2100

## Straight-cut Option with Strongest Blackleg Resistance Available

- 3 major genes of blackleg resistance: R-ACG
- Excellent straight-cut option: 103% of 75-65 RR (n=10)
- Very good lodging resistance

## Performance

# Blackleg Ratings

**A new blackleg labelling system has been developed, helping you achieve better yields.**

- 1** Submit a stubble sample to a lab to test what strains are in your field.
- 2** Choose a hybrid that defends against that strain.
- 3** Improve your blackleg resistance and boost yields!

CANTERRA SEEDS offers the most comprehensive set of resistance genes on the market, making us your go-to seed brand for blackleg defence.

## FIELD NOTES

WHEAT, OATS & BARLEY

# Wheat, Oats & Barley

Limagrain Cereals Research Canada (LCRC) is a joint venture of CANTERRA SEEDS and Limagrain – two farmer-owned companies that are passionate about seed.

---

### **EXTENSIVE**

LCRC has one of the most extensive trial networks in North America – rigorously testing products in the field to select the best varieties for farmers.

### **RAPID**

LCRC is combining traditional breeding methods with advanced techniques and technology – rapidly developing and deploying superior genetics.

### **ADDING VALUE**

A value creation system for new varieties will allow LCRC to continue providing farmers with more genetically superior options, into the long-term future.

# LCRC PRODUCTS

## CS DAYBREAK

A Canada Western Red Spring (CWRS) wheat that offers:

- High grain yield (similar to AAC Viewfield)
- Good maturity (similar to Carberry)
- Good protein content (similar to AAC Viewfield)
- Excellent rust package (R to stem rust, MR to leaf and stripe rust) and good FHB resistance (I)
- Good milling and functional quality

## CS ACCELERATE

A Canada Prairie Spring Red (CPSR) wheat that offers:

- High grain yield (105% of AAC Penhold)
- Early maturity (-1d of AAC Foray)
- Short strong straw (-10cm of AAC Foray)
- Excellent rust package (R to leaf, stem and stripe rust) and good FHB resistance (I)
- Improved milling and functional quality

# WHEAT

CS Daybreak

## Canada Western Red Spring

A high yielding CWRS variety with a strong disease resistance package, best adapted for the eastern Prairies

- High grain yield (similar to AAC Viewfield)
- Good maturity (similar to Carberry)
- Good protein content (similar to AAC Viewfield)
- Excellent rust package (R to stem rust, MR to leaf and stripe rust) and good FHB resistance (I)
- Good milling and functional quality

### Yield Performance

CS Daybreak

AAC Viewfield

100%

\*the value represents the average number observed during the three years of LCRC registration trials.

AAC Connery

## Canada Western Red Spring

Early semi-dwarf wheat with proven performance, especially under difficult harvesting conditions and intense management practices

- Excellent yield potential under any condition including intense management and irrigation
- Best grade retention, especially under difficult harvesting conditions: wet or snow
- Great disease resistance package (MR to FHB; R to stripe rust)

### Quality Performance (Protein)

AAC Connery

AAC Brandon

14.0%

Seed Guides are used as sources for performance

# WHEAT

CS Tracker

## Canada Western Red Spring

An awnless early maturity variety with excellent rust resistance, suited to a broad geography

- High yielding potential with improved protein content over current varieties
- Early, similar to CDC Go (-4 days vs. Glenn and AAC Brandon)
- Broad adaptability due to its excellent overall disease resistance

## Maturity Performance (+/- 99 Days)

CS Tracker

Seed Guides are used as sources for performance

CS Jake

## Canada Western Red Spring

An early maturing variety with excellent stripe rust protection and higher protein content

- High yielding potential with improved protein content over current varieties
- Very early, similar to CDC Go (-4.2 days vs. Glenn and AAC Brandon)
- Excellent candidate for the short growing regions in the Parkland areas

## Quality Performance (Protein)

CS Jake

Seed Guides are used as sources for performance

# WHEAT

AAC Cameron VB

## Canada Western Red Spring

The highest yielding CWRS wheat for the past three years across the Prairies. As most midge tolerant varieties, it has a taller stature. However, its strong straw offers good lodging resistance

- Highest grain yield of all CWRS varieties across the Prairies
- Best FHB resistance and lowest DON content in its class
- Excellent milling and functional quality (part of the Warburtons program)
- Variety blend with Carberry

## Yield Performance

AAC Cameron VB

CDC Landmark VB

# WHEAT

CS Accelerate

## Canada Prairie Spring Red

An early maturing, very high yielding semi-dwarf CPSR wheat with excellent rust resistance package and improved milling quality

- High grain yield (105% of AAC Penhold)
- Early maturity (-1d of AAC Foray)
- Short strong straw (-10cm of AAC Foray)
- Excellent rust package (R to leaf, stem and stripe rust) and good FHB resistance (I)
- Good milling and functional quality

### Yield Performance

CS Accelerate

AAC Penhold

\*the value represents the average number observed during the three years of LCRC trial evaluation.

AAC Crossfield

## Canada Prairie Spring Red

High yielding and early maturing semi-dwarf wheat, suitable for intense management

- Higher yielding: 110% compared to leading variety in its class
- Short, strong straw, well suited for high inputs and irrigation
- Excellent all-around rust resistance (R to Stem, Leaf and Stripe Rust)

### Yield Performance

AAC Crossfield

AAC Penhold

Seed Guides are used as sources for performance

# DURUM WHEAT

CDC Credence

## Canada Western Amber Durum

High yielding, high quality and early maturing durum with the best FHB resistance in its class

- Excellent yield performance against current varieties
- Best FHB resistance in its class
- Superior quality performance, with very high pigment concentration

AAC Congress

## Canada Western Amber Durum

Consistent high yielder and broad adaptability in any growing situation, both dryland and irrigated

- Excellent consistent yield across multiple geographies
- Excellent straw strength
- Superior quality performance, with high pigment concentration

### Yield Performance

CDC Credence

Seed Guides are used as sources for performance

## AAC Carver

### Yellow Pea

The perfect pea package: high yielding and early maturity

- Very high yields
- Suitable for all pea growing areas
- Large seed size and easy handling at harvest

### Yield Performance

Seed Guides are used as sources for performance

## AAC Comfort

### Green Pea

A new green pea with good yield potential and excellent quality attributes, such as rounder seed, bleaching tolerance and uniform green colour

- Suited to all pea-growing areas
- Excellent yield potential
- Medium maturity (1 day later than Cooper)
- Rounder seed shape (less blocky than Cooper)
- Good bleaching tolerance (similar if not better than Cooper)
- Good green colour intensity (better than Cooper)

### Seed Size (TKW)

Seed Guides are used as sources for performance

**CANTERRA SEEDS is proud to distribute  
PRIDE Seeds hybrid corn and soybean seed.**

---

**Farmers in Western Canada may now purchase the complete portfolio of PRIDE Seed hybrid corn, soybean seeds and have access to agronomic resources only through the CANTERRA SEEDS retailer network in Manitoba, Saskatchewan and Alberta.**

The PRIDE Seeds product line is derived from a global breeding and testing program, designed to develop and select best-in-class corn hybrids and soybean varieties. The breeding program uses a proprietary process called double haploid breeding, along with molecular marker technology, to identify the key characteristics in their top-performing seed.

PRIDE Seeds also conducts annual WATCH (Western Advanced Testing & Commercialization Hub) Trials in

partnership with farmers across the Prairies. These trials put corn hybrids through their paces in the Western Canadian environment, generating accurate performance results based on actual farming practices and growing conditions to help farmers make informed purchasing decisions.

Matching these best-in-class seed genetics with Western Canada-tested traits optimizes and mitigates many of the risks associated with crop production. Matching the strength of the CANTERRA SEEDS sales team with PRIDE Seeds performance-focused lines of silage corn hybrids, grain corn hybrids and soybeans delivers the most comprehensive seed portfolio to farmers in Western Canada.

Characteristics are assigned by PRIDE® based on comparisons with other PRIDE® products (not competitive products) through in-house field testing. Individual results may vary, and performance may vary from location to location and from year to year. This result may not be an indicator of results you may obtain as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible.

# GRAIN CORN

A3993G2 RIB - 2025   

- Very early grain and grazing hybrid for short season maturity zones
- Rapid emergence and superb seedling vigour for a fast early season start
- Early flowering and early maturing
- Very nice grain quality and consistency
- Brings excellent yield potential to this very early maturity zone

A4199G2 RIB - 2150   

- Dependable yield performance potential
- Rapid emergence and superb seedling vigour for a fast stand establishment
- Early flowering and early maturing
- Nice grain quality and consistency

## A4414RR - 2150

- Consistent multi-purpose grain, silage and grazing hybrid
- Very strong stalks and root strength
- Visually attractive with fixed ear type
- Keep progressive populations to maximize yield

## A4514RR - 2175

- High performance Roundup Ready® dual-purpose grain and silage hybrid
- Excellent yield performance potential with fast drydown
- Fast stand establishment and very good seedling vigour makes it a good choice for early planting

# GRAIN CORN

A4646G2 RIB - 2300   

- High performance, dual-purpose grain and silage hybrid
- Excellent yield performance potential with fast drydown
- Fast stand establishment and very good seedling vigour make it a good choice for early planting
- Well balanced plant with nice stature

A4939G2 RIB - 2400   

- A focus hybrid that has a proven track record over multiple years
- Tremendous yield potential across various environments and populations
- Great choice as dual-purpose grain and silage hybrid
- Consistent, girthy ear style
- Maintains plant integrity and attractive appearance through late season

## A5092 - 2450

- Features early flowering and finish
- Consistent, long ear length with deep kernels
- Easily adapts to all environments, including stressed soils
- Exceptional late season stalk strength and intactness

## A5225G2 RIB - 2575

- Proven focus hybrid with outstanding performance over many years
- A medium statured plant featuring consistent yield potential and strong agronomics
- This grain hybrid has open flared husks for enhanced drydown
- Rapid emergence and strong spring vigour to allow for early planting
- Best performance with aggressive populations
- Medium/Short blocky ear style

# GRAIN CORN

A5430 - 2625 

- Conventional hybrid with proven performance with strong yield potential
- Great drought and stress tolerance
- Flexible as a dual-purpose usage hybrid
- Early flowering with very strong late season intactness and stalk strength

A5432G2 RIB - 2650 

- Proven performance with strong yield potential
- Flexible as a dual-purpose hybrid
- Early flowering with very strong, late season intactness and stalk strength
- Great drought and stress tolerance

# PRIDE TRS

PRIDE Seeds goes beyond field appearance to ensure their hybrids deliver what matters most at harvest: yield, energy, digestibility, palatability and overall nutritional value. Their team can help you manage your crop from start to finish, from variety selection, agronomics, harvest and storage management, to helping you maximize the yield, quality potential and performance you need to improve the productivity of your herd investment. Maximize milk and meat production per acre with PRIDE TRS.

## What is PRIDE TRS?

PRIDE Total Ration Solutions (TRS) is the testing and information program we use to identify our best forage products. Alfalfa, together with Effective Digestible Fibre (EDF) and Effective Dual Purpose (EDP) silage hybrids, varieties and forage mixtures, are designed to meet the energy, digestibility and protein needs of dairy and beef operations today.

**PRIDE TRS system** identifies hybrids which maximize silage yield potential and quality. Hybrids are further segmented into two groups:

**Effective Digestible Fibre (EDF)** hybrids are silage specific and offer the advantage of high digestibility and palatability for improved feeding efficiency.

**Effective Dual Purpose (EDP)** hybrids offer consistent high energy and silage quality PLUS the flexibility to use as a grain hybrid depending on your operational needs.

## Traits

**RR** = Roundup Ready® Corn 2 =  = **G1**

**VT2PRIB** = VT Double PRO® RIB Complete® =

**VTDoublePRO** =  = **G2**

**Roundup**® =  **Conventional** = **C**

Characteristics are assigned by PRIDE® based on comparisons with other PRIDE® products (not competitive products) through in-house field testing. Individual results may vary, and performance may vary from location to location and from year to year. This result may not be an indicator of results you may obtain as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible.

# SILAGE CORN

AS1017RR EDF - 2050-2250

- Early silage, high-moisture corn, offering opportunity in shorter season growing areas
- Slow grain-drying rate preserves reliable and consistent feed quality at ideal moisture content
- Strong emergence and aggressive spring vigour
- Tall uniform plant height. Produces consistent ear size, producing flint kernels on white cob

A4414RR - 2050-2175

- Features dual-purpose characteristics
- Combines early maturity with very good digestibility for high energy yield
- Outstanding emergence, standability and health
- Long lasting staygreen
- Early grain maturity ensuring a high starch content and an early harvest

## A4477HM - 2150-2250

- Conventional silage, high moisture, higher grain density and disease tolerance
- Slow grain-drying rate preserves reliable and consistent feed quality at ideal moisture content
- Exceptional emergence and aggressive spring vigour for early maturity zone
- High starch levels provide excellent quality silage
- Excellent for grazing use with high yield, nutrition and strong stalks

## A4705HMRR - 2225-2350

- Benchmark product for the silage, grazing and high moisture corn farmer
- Slow grain-drying rate preserves reliable and consistent feed quality at ideal moisture content for a wide harvest window
- Consistently high quality, energy content and intake potential
- Strong emergence and aggressive spring vigour for early maturity zone
- Excellent for grazing use with high yield, nutrition and strong stalks

# SILAGE CORN

A4514RR - 2200-2325

- NEW dual-purpose grain and silage. Roundup Ready® hybrid ideally suited for 2225 CHU regions
- Combines very good digestibility and high starch content for high energy yield
- Strong emergence, standability and health
- Early grain maturity ensures a high starch content and an early harvest

A4646G2 RIB - 2225-2350

- Dual-purpose grain and silage hybrid ideally suited for 2250 CHU regions
- Combines very good digestibility and high starch content for high energy yield
- Strong emergence, standability and health
- Early grain maturity ensures a high starch content and an early harvest

## A4939G2 RIB - 2250-2375

- Ideal balance of forage yield and energy content
- Maximum starch yield with rock solid performance
- Consistent top-end tonnage punch with flex ears
- An excellent dual-purpose grain or silage hybrid choice for varying soil types
- Very good nutritional grain quality, outstanding health and agronomics
- Good option for high quality silage with a high energy content and starch levels

## AS1027RR EDF - 2275-2450

- NEW introductory choice for high moisture corn or silage feed
- Very tall plant with consistent ears that produces flint kernels on white cob
- Excellent silage characteristics, yield and energy content
- Slow grain and plant-drying rate preserves reliable and consistent feed quality at ideal moisture content
- Excellent choice for beef feedlot farmers
- Additional staygreen nature for a wider harvest window

# SILAGE CORN

AS1037RR EDF - 2275-2450

- High performance choice for high moisture corn or silage feed
- Tall plant with consistent ears that produce flint kernels on white cob
- Excellent silage characteristics, yield and energy content
- Slow grain and plant drying rate preserves reliable and consistent feed quality at ideal moisture content
- Additional staygreen nature for a wider harvest window
- Outstanding health and standability

AS1047RR EDF - 2275-2475

- Premium choice for high moisture corn or silage feed. Mass type, high volume plant
- Big, tall plant with girthy ears that produce flint kernels on white cob
- Features consistent, heavy top-end tonnage
- Slow plant and grain drying rate preserves reliable and consistent feed quality at ideal moisture content
- Extremely well-suited for beef feedlot farmers

A5432G2 RIB - 2425-2575

- Unrivalled starch content and productive starch yield
- Excellent drought and stress tolerance
- Early flowering for maturity rating
- Medium-Tall plant with consistent full ear size
- Increased energy for more milk/beef produced
- Good emergence, early vigour, standability and health ensures maximum performance

# FOCUSED ON A GREAT START

## Stamina™

Fungicide Seed Treatment

Fortenza® Maxim® Quattro when applied with Stamina™ in corn provides powerful early-season insect and disease control, setting the new standard for seed treatment. Fortenza® Maxim® Quattro delivers exceptional early-season insect control of European Chafer, Wireworm and Cutworm.

The addition of Stamina™ offers increased seedling vigour for more consistent and uniform emergence with greater ability to manage minor environmental stress for maximum yield potential and a great start to the season.

### Focused on performance

Available on the complete lineup of PRIDE Seeds corn.

Fortenza®, Maxim®, Stamina and the Syngenta logo are trademarks of a Syngenta Group Company.

PRIDE SEEDS

# GRAZING CORN

A3993G2 RIB - 2025 CHU

VT DoublePRO<sup>®</sup>  
RIB COMPLETE

- Very early grazing corn for short season maturity zone
- Rapid emergence and superb seedling vigour
- Excellent starch levels with strong grain quality
- Strong stalks and plant health make it an excellent choice for grazing

AS1017RR EDF - 2150 CHU

- Robust, aggressive plant type with consistent ear size
- Slower grain-drying rate with a consistent feed quality
- Highly digestible stalks with good starch levels
- Strong emergence and aggressive spring vigour

## A4477HM - 2200 CHU

- Conventional hybrid with higher grain density and disease tolerance
- Exceptional emergence and aggressive spring vigour
- High starch levels provide an excellent feed source
- A strong choice for grazing with high yield, nutrition and strong stalks

## A4705HMRR - 2225 CHU

- Benchmark product for grazing corn
- Consistently high quality, energy content and intake
- Strong emergence and an aggressive plant type
- Proven hybrid with high yield, nutrition and strong stalks

# GRAZING CORN

A4514RR - 2250 CHU

- Exciting new straight Roundup Ready® hybrid
- Strong emerging variety with excellent standability
- Combines very good digestibility and high starch content for high energy feed
- Early grain maturity ensures a high starch content

A4646G2 RIB -  
2300 CHU

- New traited hybrid for grazing corn market
- Combines very good digestibility and high starch content | for high energy yield
- Strong emergence, standability and plant health

## AS1037RR EDF - 2450 CHU

- High performance choice for grazing corn
- Tall plant with consistent ear size
- Outstanding plant health and standability
- Excellent yield and energy content along with high digestibility make this hybrid a strong grazing corn

\*IDC = Iron Deficiency Chlorosis

Characteristics are assigned by PRIDE® based on comparisons with other PRIDE® products (not competitive products) through in-house field testing. Individual results may vary, and performance may vary from location to location and from year to year. This result may not be an indicator of results you may obtain as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible.

## SYMBOLS USED

### Plant Height:

**S** Short  
**M** Medium  
**M/S** Medium Short  
**M/T** Medium Tall  
**T** Tall

### For All Others:

**F** Fair  
**G** Good  
**VG** Very Good  
**EXC** Excellent

### Canopy:

**SL** Slender  
**M** Medium  
**M/B** Medium Bushy  
**B** Bushy

### Phytophthora

#### Resistance Gene:

**RPS 1c** = Resistance Gene  
 1c to PRR Race of  
 P. sojae  
**RPS 1k** = Resistance Gene  
 1k to PRR Race  
 of P. sojae

= Soybean Cyst Nematode

## Traits

**RR2Y** = Roundup Ready 2 Yield®

**RR2Xtend** = Roundup Ready 2 Xtend®

# SOYBEANS

PS 00078 XRN  

- NEW introductory Roundup Ready 2 Xtend® variety for mid to late MG000
- Addition to lineup to fill an opportunity in ultra early season zones
- Value added SCN and Phytophthora Rps 1c root protection
- Provides tolerance to dicamba and glyphosate herbicides
- Excellent resistance to white mould
- Max yield potential with narrow row widths
- Position on early side of PS 00095 R2

PS 0044 XRN - 2425  

- Roundup Ready 2 Xtend® variety
- Ideally suited for the early to mid-MG00 season zones' broad acre placement as it has very good stress tolerance, an excellent disease package and strong yield potential
- Value-added SCN and Phytophthora Rps 1k root rot protection and Semi-Tolerant IDC rating
- Provides tolerance to dicamba and glyphosate herbicides

## PS 0068 XR - 2450

- Roundup Ready 2 Xtend® variety ideally suited for the mid-MG00 season zones
- An excellent disease package along with Tolerant IDC rating and very good stress tolerance
- Phytophthora Rps 1c root rot protection
- Provides tolerance to dicamba and glyphosate herbicides

## PS 0074 R2 - 2475

- Proven Roundup Ready 2 Yield® variety ideally suited for the long season MG00 market area
- Continues to meet high expectations with strong performance year after year
- Tolerant IDC rating
- Excellent branching and aggressive canopy
- Ideal variety for 30" row widths

**Monsanto Company is a member of Excellence Through Stewardship® (ETS).** Monsanto products are commercialized in accordance with ETS Product Launch Stewardship Guidance, and in compliance with Monsanto's Policy for Commercialization of Biotechnology-Derived Plant Products in Commodity Crops. These products have been approved for import into key export markets with functioning regulatory systems. Any crop or material produced from these products can only be exported to, or used, processed or sold in countries where all necessary regulatory approvals have been granted. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for these products. Excellence Through Stewardship® is a registered trademark of Excellence Through Stewardship.

**ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS.**

Roundup Ready 2 Xtend® soybeans contain genes that confer tolerance to glyphosate and dicamba. Agricultural herbicides containing glyphosate will kill crops that are not tolerant to glyphosate, and those containing dicamba will kill crops that are

not tolerant to dicamba. Contact your Bayer dealer or call the Bayer technical support line at 1-800-667-4944 for recommended Roundup Ready® Xtend Crop System weed control programs. Roundup Ready® technology contains genes that confer tolerance to glyphosate, an active ingredient in Roundup® brand agricultural herbicides. Agricultural herbicides containing glyphosate will kill crops that are not tolerant to glyphosate. RIB Complete®, Roundup Ready 2 Technology and Design®, Roundup Ready 2 Xtend®, Roundup Ready 2 Yield®, Roundup Ready®, Roundup®, TruFlex™ and VT Double PRO® are trademarks of Bayer Group, Monsanto Canada ULC licensee. BayerValue™ is a trademark of the Bayer Group.

Clearfield and the unique Clearfield symbol are registered trademarks of BASF Agrochemical Products B.V.; INVIGOR® is a registered trade-mark of BASF; all used with permission by BASF Canada Inc.

PRIDE® & Design and P® & Design are registered trademarks of AgReliant Genetics Inc.
