# Seed the Difference.™

## 2021 SEED GUIDE

DISTRIBUTOR OF:

PRIDE SEEDS

**Seed the Difference.™**

Our company was founded by nine Canadian seed growers, and we are a farmer-owned company to this day. We offer one of the broadest seed portfolios in Western Canada, cultivated through local investments in plant breeding, access to a global network of germplasm and traits, and our steadfast belief that farmers deserve the best.

With strategic partnerships around the world, and varieties tested locally across Western Canada, we're proud to produce, market and sell the very best in seed.

## Deeply rooted in the Canadian Prairies.

**More variety to build a crop plan that fits your farm.**

**Our varieties feature leading genetics and traits.**

**Our crops are tested for local performance.**

*Proudly*  
**A Farmer-Owned Company**

**We are a Canadian company created by farmers,  
for farmers, and we are 100% committed to seed.**

## **WE INVEST**

locally in plant breeding and access a global network  
of germplasm and traits.

## **WE PRODUCE**

a diverse portfolio of top-quality field crop seed.

## **WE GROW**

through strategic partnerships, and a commitment  
to our farmer-owned roots.

## THE FASTEST REWARDS PROGRAM ON THE PRAIRIES

Your Germinating Success™ Rewards:

**CANOLA** 

**\$15/Bag** [ 16-31 Bags ]  
**\$30/Bag** [ 32-63 Bags ]  
**\$40/Bag** [ 64+ Bags ]

**CORN** 

**\$3.75/Bag** [ 64-127 Bags ]  
**\$7.50/Bag** [ 128+ Bags ]

*Plus:*

*Order from Agro.Club Canada by Dec. 15 and watch your rewards grow!*

**CANOLA** 

**\$10/Bag** [ 16+ Bags ]

**CORN** 

**\$2.50/Bag** [ 64+ Bags ]

Place your order at

**canterra.agro.club**

Get **50%** of your rewards in your wallet before the seed hits the soil.\*

Place your order at **canterra.agro.club**

## IT'S AS EASY AS 1-2-3

1

### GO ONLINE

Choose CANTERRA SEEDS  
canola at:

**canterra.agro.club**

2

### ORDER

Place your order with the seed  
retail of your choice.

3

### PICK UP

Complete the purchase at your  
seed retail and enjoy your rewards!

\*Instantly qualify for an early Germinating Success™ rewards payment when you order your CANTERRA SEEDS canola from your preferred retailer at canterra.agro.club by Dec. 15, 2020. Early rewards payment will equal 50% of total rewards earned on qualifying orders placed through canterra.agro.club by Dec. 15, 2020. If early rewards payment is greater than total rewards earned on your qualifying purchases by final program deadline (July 31, 2021), you will be required to return the difference. Visit CANTERRA.com for full details.

# Canola

Proudly offering leading genetics and a wide range of trait options designed to fit your farm. Maximize your ROI with high performing canola hybrids from CANTERRA SEEDS.

# Blackleg Ratings

A blackleg labelling system has been developed, helping you achieve better yields.

- 1 Submit a stubble sample to a lab to test what strains are in your field.
- 2 Choose a hybrid that defends against that strain.
- 3 Improve your blackleg resistance and boost yields!

CANTERRA SEEDS offers the most comprehensive set of resistance genes on the market, making us your go-to seed brand for blackleg defence.

# Wheat, Oats & Barley

Pure, premium-quality seed,  
produced under the highest  
standards to meet the demands  
of farmers and end-users.

CANTERRA  
SEEDS

Limagrains Cereals Research Canada (LCRC) is a joint venture of CANTERRA SEEDS and Limagrains – two farmer-owned companies that are passionate about seed.

## EXTENSIVE

LCRC is the largest Hard Red Spring wheat breeding program in North America, and has one of the most extensive trial networks. Local performance is best predicted by local data – LCRC rigorously tests varieties under local conditions to select the best options for farmers.

## RAPID

LCRC combines traditional breeding methods with advanced techniques and technology – rapidly developing and deploying superior seed genetics.

VARIETY USE AGREEMENT  
**VUA**<sup>™</sup>  
BREEDING INNOVATION

## ADDING VALUE

By participating in the Variety Use Agreement\* (VUA) Pilot Program, LCRC helps pave the way for long-term, value-driven plant breeding. LCRC will continue to provide farmers with genetically superior options.

\*Learn more: [seedvaluecreation.ca](https://seedvaluecreation.ca)

# NEW LCRC PRODUCTS

## CS DAYBREAK VUA

A Canada Western Red Spring  
(CWRS) wheat that offers:

- High grain yield (better than AAC Viewfield)
- Good maturity (similar to Carberry)
- Good protein content (similar to AAC Viewfield)
- Excellent rust package (R to stem rust, MR to leaf and stripe rust) and good FHB resistance (I)
- Good milling and functional quality

## CS ACCELERATE VUA

A Canada Prairie Spring  
Red (CPSR) wheat that offers:

- High grain yield (105% of AAC Penhold)
- Early maturity (-1d of AAC Foray)
- Short strong straw (-10cm of AAC Foray)
- Excellent rust package (R to leaf, stem and stripe rust) and good FHB resistance (I)
- Improved milling and functional quality

# WHEAT

	VARIETY	DESCRIPTION	Maturity	Height	Lodging	FHB	Stripe Rust	Leaf Rust	Stem Rust
CWRS	 CS Daybreak  VUA	A high yielding variety with strong disease package best adapted to eastern Prairies	M	+5	G	I	MR	MR	R
	 CS Jake 	A variety with very early maturity, great stripe rust resistance, and high protein content	VE	+7	VG	MS	R	MR	R
	 CS Tracker 	An awnless early maturity variety with excellent rust resistance, suited to a broad geography	E	+5	VG	I	R	R	R
	AAC Cameron VB  	A very high yielding midge tolerant variety with lowest FHB symptoms and DON accumulation of all wheat varieties	M	+13	VG	I	S	MR	MR
	AAC Connery 	An awnless variety that combines early maturity with the benefits of short, strong straw and high protein	E	+3	VG	MR	R	MR	R
	Thorsby 	An awnless variety with early maturity and rust resistance, suited to a broad geography	E	+13	G	I	R	R	MR

Agronomic and disease ratings reflect provincial seed guide and/or official registration data. Height cm +/- AAC Brandon (CWRS and CPSR) and Strongfield (CWAD), CDC Buteo (CWRW).

# WHEAT

CS Daybreak 

## Canada Western Red Spring

A high yielding CWRS variety with a strong disease resistance package, best adapted for the eastern Prairies

- High grain yield (better than AAC Viewfield)
- Good maturity (similar to Carberry)
- Good protein content (similar to AAC Viewfield)
- Excellent rust package (R to stem rust, MR to leaf and stripe rust) and good FHB resistance (I)
- Good milling and functional quality

### Yield Performance

CS Daybreak

AAC Viewfield

100%

The value represents the average number observed during the three years of LCRC registration trials

AAC Connery 

## Canada Western Red Spring

Early semi-dwarf wheat with proven performance, especially under difficult harvesting conditions and intense management practices

- Excellent yield potential under any condition including intense management and irrigation
- Best grade retention, especially under difficult harvesting conditions: wet or snow
- Great disease resistance package (MR to FHB; R to stripe rust)

### Quality Performance (Protein)

AAC Connery

AAC Brandon

14.0%

Seed Guides are used as sources for performance

# WHEAT

CS Tracker

## Canada Western Red Spring

An awnless early maturity variety with excellent rust resistance, suited to a broad geography

- High yielding potential with improved protein content over current varieties
- Early, similar to AAC Redwater (-4 days vs. AAC Brandon)
- Broad adaptability due to its excellent overall disease resistance

### Maturity Performance (+/- 99 Days)

CS Tracker

AAC Redwater

Seed Guides are used as sources for performance

CS Jake

## Canada Western Red Spring

An early maturing variety with excellent stripe rust protection and higher protein content

- High yielding potential with improved protein content over current varieties
- Very early, similar to AAC Redwater [-4.2 days vs. AAC Brandon]
- Excellent candidate for the short growing regions in the Parkland areas

### Quality Performance (Protein)

CS Jake

AAC Redwater

Seed Guides are used as sources for performance

# WHEAT

AAC Cameron VB

## Canada Western Red Spring

The highest yielding CWRS wheat for the past three years across the Prairies. As most midge tolerant varieties, it has a taller stature. However, its strong straw offers good lodging resistance

- Highest grain yield of all CWRS varieties across the Prairies
- Best FHB resistance and lowest DON content in its class
- Excellent milling and functional quality (part of the Warburtons program)
- Variety blend with Carberry

## Yield Performance

AAC Cameron VB

CDC Landmark VB

**Your success is crucial to our success and each year we strive to deliver superb product performance, enhanced by the PRIDE Seeds agronomy experts, CANTERRA SEEDS sales professionals and robust network of retailers. These are the people who know the corn and soybean lineup inside and out and who are well-positioned to help grow your farm operation through:**

- Best-in-class genetics together with industry-leading traits and seed treatment protection
- PRIDE Seeds' access to global research and state-of-the-art breeding technology through AgReliant® Genetics
- Agronomy guidance and product positioning to help you take full advantage of your seed's genetic potential

- Comprehensive data collection through plot programs across Canada and the US, guiding corn and soybeans suited for Western Canada.
- Order online from your preferred retailer at [canterra.agro.club](https://canterra.agro.club)
- FCC Financing now available
- Superior seed quality driven by our dedicated production teams
- CANTERRA SEEDS Germinating Success™ reward program for growers

# The Best Grain Corn Genetics on the Prairies

The PRIDE Seeds product line is derived from a global breeding program, designed to develop and select best-in-class corn hybrids for your farm.

## GRAIN CORN

PRIDE Seeds' grain corn hybrids offer the right package for your farm, providing high yields, test weight and strong disease resistance. We carry a range of early, mid and full maturing grain varieties to give you more choice and help you manage risk and drying costs. Use the chart below to find early, mid or full grain corn hybrids to fit your farm.

# GRAIN CORN

Characteristics are assigned by PRIDE® based on comparisons with other PRIDE® products (not competitive products) through in-house field testing. Individual results may vary, and performance may vary from location to location and from year to year. This result may not be an indicator of results you may obtain as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible.

## GRAIN CORN

A3993G2 RIB - 2025

- Very early grain and grazing hybrid for short season maturity zones
- Rapid emergence and superb seedling vigour for a fast early season start
- Early flowering and early maturing
- Very nice grain quality and consistency
- Brings excellent yield potential to this very early maturity zone

A4199G2 RIB - 2150

- Dependable yield performance potential
- Rapid emergence and superb seedling vigour for a fast stand establishment
- Early flowering and early maturing
- Nice grain quality and consistency

## GRAIN CORN

A4414RR - 2150

- Consistent multi-purpose grain, silage and grazing hybrid
- Very strong stalks and root strength
- Visually attractive with fixed ear type
- Keep progressive populations to maximize yield

A4514RR - 2275

- High performance Roundup Ready® dual-purpose grain and silage hybrid
- Excellent yield performance potential with fast drydown
- Fast stand establishment and very good seedling vigour makes it a good choice for early planting

## GRAIN CORN

A4646G2 RIB - 2300   

- High performance, dual-purpose grain and silage hybrid
- Excellent yield performance potential with fast drydown
- Fast stand establishment and very good seedling vigour make it a good choice for early planting
- Well balanced plant with nice stature

A4939G2 RIB - 2400   

- A focus hybrid that has a proven track record over multiple years
- Tremendous yield potential across various environments and populations
- Great choice as dual-purpose grain and silage hybrid
- Consistent, girthy ear style
- Maintains plant integrity and attractive appearance through late season

## GRAIN CORN

### A5092 - 2450

- Features early flowering and finish
- Consistent, long ear length with deep kernels
- Easily adapts to all environments, including stressed soils
- Exceptional late season stalk strength and intactness

### A5225G2 RIB - 2575

- Proven focus hybrid with outstanding performance over many years
- A medium statured plant featuring consistent yield potential and strong agronomics
- This grain hybrid has open flared husks for enhanced drydown
- Rapid emergence and strong spring vigour to allow for early planting
- Best performance with aggressive populations
- Medium/Short blocky ear style

## GRAIN CORN

### A5430 - 2625

- Conventional hybrid with proven performance with strong yield potential
- Great drought and stress tolerance
- Flexible as a dual-purpose usage hybrid
- Early flowering with very strong late season intactness and stalk strength

### A5432G2 RIB - 2650

- Proven performance with strong yield potential
- Flexible as a dual-purpose hybrid
- Early flowering with very strong, late season intactness and stalk strength
- Great drought and stress tolerance

## GRAIN CORN

### A5105 -2500

- NEW High performance conventional hybrid for 2500 CHU maturity range
- A medium-statured plant featuring consistent ear size and plant stature
- Will respond to higher populations

### A5222 - 2550

- Conventional version of A5225 G2 for highly consistent yield with excellent drydown
- A medium-statured plant featuring consistent yield potential and strong agronomics
- This grain hybrid has open flared husks for enhanced drydown
- Rapid emergence and strong spring vigour all for early planting
- Best performance with aggressive populations
- Medium/short, blocky ear style

## GRAIN CORN

### A5404G2 RIB - 2625

- NEW 2625 CHU introduction that features above-ground insect trait protection
- Short plant height with sturdy stalks
- Stout, blocky ear size and girth
- Has shown very stable performance with top-end yield potential
- Early flowering allows for rapid grain setup

### A5383G8 RIB - 2675

- NEW very exciting 2675 CHU introduction that features above and below-ground insect trait protection
- Workhorse type hybrid with good defensive agronomics
- Versatile hybrid adapted to all production systems
- Fixed ear type, full dent grain and good girth and flared husk

# PRIDE TRS SYSTEM

The PRIDE Total Ration Solutions (TRS) System goes beyond field appearance to ensure our hybrids deliver what matters most at harvest; yield, energy, digestibility, palatability and overall nutritional value. Their team can help you manage your crop from start to finish, from variety selection, agronomics, harvest and storage management, to helping you maximize the yield, quality potential and performance you need to improve the productivity of your herd investment.

## **What is PRIDE TRS?**

PRIDE TRS System is the testing and information program we use to identify our best forage products. Alfalfa, together with Effective Digestible Fibre (EDF) and Effective Dual Purpose (EDP) silage hybrids, varieties and forage mixtures, are designed to meet the energy, digestibility and protein needs of dairy and beef operations today.

**PRIDE TRS system** identifies hybrids which maximize silage yield potential and quality. Hybrids are further segmented into two groups:

**Effective Digestible Fibre (EDF)** hybrids are silage specific and offer the advantage of high digestibility and palatability for improved feeding efficiency.

**Effective Dual Purpose (EDP)** hybrids offer consistent high energy and silage quality PLUS the flexibility to use as a grain hybrid depending on your operational needs.

# The Best Silage Corn Genetics on the Prairies

PRIDE Seeds breeds, tests and produces silage corn hybrids with a focus on performance.

## SILAGE CORN

PRIDE Seeds' silage hybrids are bred with optimal herd performance in mind. Choose from silage-specific Effective Digestible Fiber (EDF) and Effective Dual Purpose (EDP) options with the flexibility to match your needs. Use the scale below to see which varieties meet your CHU requirements.

## SILAGE CORN

AS1017RR EDF - 2050-2250

- Early silage, high-moisture corn, offering opportunity in shorter season growing areas
- Slow grain-drying rate preserves reliable and consistent feed quality at ideal moisture content
- Strong emergence and aggressive spring vigour
- Tall uniform plant height. Produces consistent ear size, producing flint kernels on white cob

A4414RR - 2050-2175

- Features dual-purpose characteristics
- Combines early maturity with very good digestibility for high energy yield
- Outstanding emergence, standability and health
- Long lasting staygreen
- Early grain maturity ensuring a high starch content and an early harvest

## SILAGE CORN

A4477HM - 2150-2250

- Conventional silage, high moisture, higher grain density and disease tolerance
- Slow grain-drying rate preserves reliable and consistent feed quality at ideal moisture content
- Exceptional emergence and aggressive spring vigour for early maturity zone
- High starch levels provide excellent quality silage
- Excellent for grazing use with high yield, nutrition and strong stalks

A4705HMRR - 2225-2350

- Benchmark product for the silage, grazing and high moisture corn farmer
- Slow grain-drying rate preserves reliable and consistent feed quality at ideal moisture content for a wide harvest window
- Consistently high quality, energy content and intake potential
- Strong emergence and aggressive spring vigour for early maturity zone
- Excellent for grazing use with high yield, nutrition and strong stalks

## SILAGE CORN

A4514RR - 2200-2275

- NEW dual-purpose grain and silage. Roundup Ready® hybrid ideally suited for 2225 CHU regions
- Combines very good digestibility and high starch content for high energy yield
- Strong emergence, standability and health
- Early grain maturity ensures a high starch content and an early harvest

A4646G2 RIB - 2200-2250

- Dual-purpose grain and silage hybrid ideally suited for 2250 CHU regions
- Combines very good digestibility and high starch content for high energy yield
- Strong emergence, standability and health
- Early grain maturity ensures a high starch content and an early harvest

## SILAGE CORN

A4939G2 RIB - 2250-2375

- Ideal balance of forage yield and energy content
- Maximum starch yield with rock solid performance
- Consistent top-end tonnage punch with flex ears
- An excellent dual-purpose grain or silage hybrid choice for varying soil types
- Very good nutritional grain quality, outstanding health and agronomics
- Good option for high quality silage with a high energy content and starch levels

AS1027RR EDF - 2250-2425

- NEW introductory choice for high moisture corn or silage feed
- Very tall plant with consistent ears that produces flint kernels on white cob
- Excellent silage characteristics, yield and energy content
- Slow grain and plant-drying rate preserves reliable and consistent feed quality at ideal moisture content
- Excellent choice for beef feedlot farmers
- Additional staygreen nature for a wider harvest window

## SILAGE CORN

AS1037RR EDF - 2275-2450

- High performance choice for high moisture corn or silage feed
- Tall plant with consistent ears that produce flint kernels on white cob
- Excellent silage characteristics, yield and energy content
- Slow grain and plant drying rate preserves reliable and consistent feed quality at ideal moisture content
- Additional staygreen nature for a wider harvest window
- Outstanding health and standability

AS1047RR EDF - 2275-2475

- Premium choice for high moisture corn or silage feed. Mass type, high volume plant
- Big, tall plant with girthy ears that produce flint kernels on white cob
- Features consistent, heavy top-end tonnage
- Slow plant and grain drying rate preserves reliable and consistent feed quality at ideal moisture content
- Extremely well-suited for beef feedlot farmers

## SILAGE CORN

## FIELD NOTES

A5432G2 RIB - 2425-2575

- Unrivaled starch content and productive starch yield
- Excellent drought and stress tolerance
- Early flowering for maturity rating
- Medium-Tall plant with consistent full ear size
- Increased energy for more milk/beef produced
- Good emergence, early vigour, standability and health ensures maximum performance

# GRAZING CORN

A3993G2 RIB - 2025 CHU   

- Very early grazing corn for short season maturity zone
- Rapid emergence and superb seedling vigour
- Excellent starch levels with strong grain quality
- Strong stalks and plant health make it an excellent choice for grazing

AS1017RR EDF - 2150 CHU  

- Robust, aggressive plant type with consistent ear size
- Slower grain-drying rate with a consistent feed quality
- Highly digestible stalks with good starch levels
- Strong emergence and aggressive spring vigour

## GRAZING CORN

### A4477HM - 2200 CHU

- Conventional hybrid with higher grain density and disease tolerance
- Exceptional emergence and aggressive spring vigour
- High starch levels provide an excellent feed source
- A strong choice for grazing with high yield, nutrition and strong stalks

### A4705HMRR - 2225 CHU

- Benchmark product for grazing corn
- Consistently high quality, energy content and intake
- Strong emergence and an aggressive plant type
- Proven hybrid with high yield, nutrition and strong stalks

## GRAZING CORN

A4514RR - 2250 CHU

- Exciting new straight Roundup Ready® hybrid
- Strong emerging variety with excellent standability
- Combines very good digestibility and high starch content for high energy feed
- Early grain maturity ensures a high starch content

A4646G2 RIB -  
2300 CHU

- New traited hybrid for grazing corn market
- Combines very good digestibility and high starch content for high energy yield
- Strong emergence, standability and plant health

## AS1037RR EDF - 2450 CHU

- High performance choice for grazing corn
- Tall plant with consistent ear size
- Outstanding plant health and standability
- Excellent yield and energy content along with high digestibility make this hybrid a strong grazing corn

### Traits

**RR2Y** = Roundup Ready 2 Yield®

**RR2Xtend** = Roundup Ready 2 Xtend®

Characteristics are assigned by PRIDE® based on comparisons with other PRIDE® products (not competitive products) through in-house field testing. Individual results may vary, and performance may vary from location to location and from year to year. This result may not be an indicator of results you may obtain as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible.

PS0068 XR

- Roundup Ready 2 Xtend®
- Variety ideally suited for the mid-MG00 season zones.
- An excellent disease package along with Tolerant IDC rating and very good stress tolerance.
- Phytophthora Rps 1c root rot protection.

PS0074 XR

- Proven Roundup Ready 2 Yield® variety ideally suited for the long season MG00 market area.
- Continues to meet high expectations with strong performance year after year.
- Tolerant IDC rating.
- Excellent branching and aggressive canopy.
- Ideal variety for 30” row widths.

**Monsanto Company is a member of Excellence Through Stewardship® (ETS).** Monsanto products are commercialized in accordance with ETS Product Launch Stewardship Guidance, and in compliance with Monsanto's Policy for Commercialization of Biotechnology-Derived Plant Products in Commodity Crops. These products have been approved for import into key export markets with functioning regulatory systems. Any crop or material produced from these products can only be exported to, or used, processed or sold in countries where all necessary regulatory approvals have been granted. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for these products. Excellence Through Stewardship® is a registered trademark of Excellence Through Stewardship.

**ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS.** Roundup Ready 2 Xtend® soybeans contain genes that confer tolerance to glyphosate and dicamba. Agricultural herbicides containing glyphosate will kill crops that are not tolerant to glyphosate, and those containing dicamba will kill crops that are not tolerant to dicamba. Contact your Bayer dealer or call the Bayer technical support line at 1-800-667-4944 for recommended Roundup Ready® Xtend Crop System weed control programs. Roundup Ready® technology contains genes that confer tolerance to glyphosate, an active ingredient in Roundup® brand agricultural herbicides. Agricultural herbicides containing glyphosate will kill crops that are not tolerant to glyphosate. RIB Complete®, Roundup Ready 2 Technology and Design®, Roundup Ready 2 Xtend®, Roundup Ready 2 Yield®, Roundup Ready®, Roundup®, TruFlex™ and VT Double PRO® are trademarks of Bayer Group, Monsanto Canada ULC licensee. BayerValue™ is a trademark of the Bayer Group.

Clearfield and the unique Clearfield symbol are registered trade-marks of BASF Agrochemical Products B.V.; INVIGOR® is a registered trade-mark of BASF; all used with permission by BASF Canada Inc.

PRIDE® & Design and P® & Design are registered trademarks of AgReliant Genetics Inc.
