LOOK FOR OUR YIELD STAMP!

CANTERRA SEEDS' canola hybrids offer the traits you want and genetics you need. Look for these Yield Stamps to identify canola hybrids that provide extra protection to maximize your canola yield.

NEW

PodProtect™

Introducing the PodProtect™ Yield Stamp! These hybrids offer enhanced protection against pod shatter with our PodProtect™ trait, designed for superior straight cut performance.

Straight Cut

Look for the Straight Cut Yield Stamp for products suitable for delayed swathing or straight cutting, based on timing and harvest conditions. These hybrids were bred to have increased shatter tolerance.

Clubroot

All CANTERRA SEEDS canola hybrids have clubroot protection. Products with the Clubroot Yield Stamp have additional genes to protect against clubroot in high-risk zones.

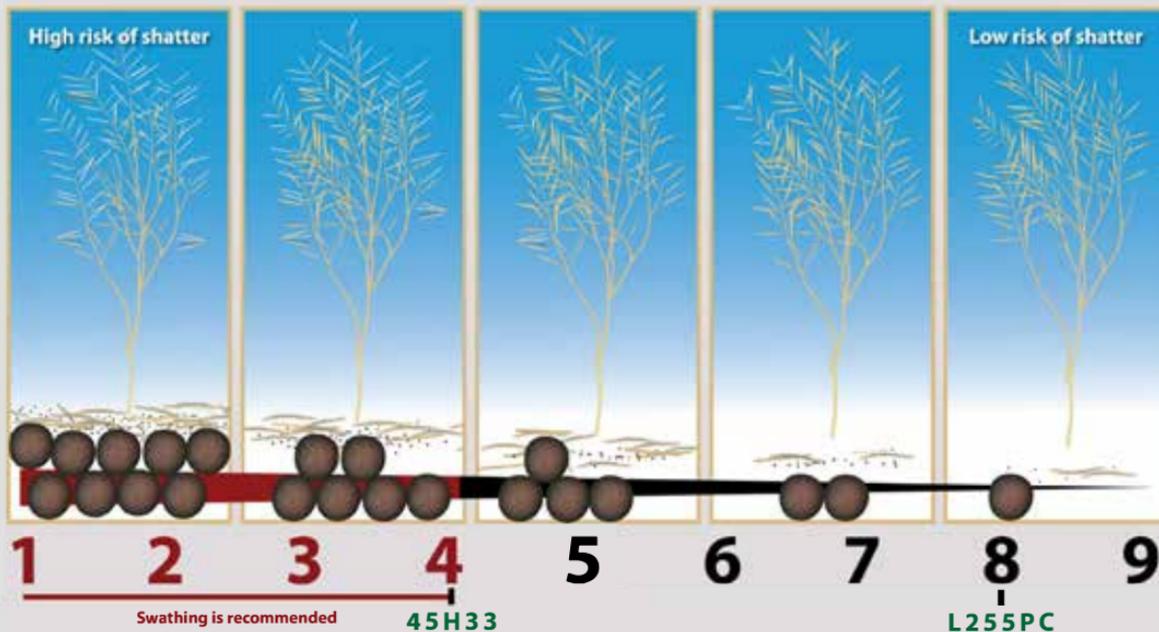

Blackleg

All CANTERRA SEEDS canola hybrids have blackleg protection. For resistance to multiple races of blackleg, look for our Blackleg Yield Stamp.

Canola shatter ratings

Relative shatter performance of canola under pressure

This represents the level of canola shatter risk (which is different from pod drop) in a canola cultivar. Values do not depict a specific percentage of shatter but allow cultivars to be considered relative to the designated checks (45H33 and L255PC) which anchor the numerical/descriptive claim based on the seed provider data. The ratings are not a promise or performance guarantee given the significant environmental effects impacting the trait as described in stewardship documents. Please consult your retailer for recommendations.

CLUBROOT

Clubroot is a serious soil-borne disease that can cause premature death and yield losses in canola. Resistant canola hybrids are an important tool in your clubroot management plan.

CANTERRA SEEDS has you covered with excellent clubroot resistance genetics.

HYBRID	RATING
CS4000 LL	1st Generation Resistance 1 st generation resistance is suitable if there is no known clubroot on your farm. With known clubroot presence, consider switching to 2 nd generation if you've used 2+ rotations with 1 st gen genetics, or when 1 st gen resistance start showing symptoms.
CS3000 TF	2nd Generation Resistance 2 nd generation resistance should be used in known clubroot areas once 1 st generation resistance is showing symptoms or pathotypes are known and 2 nd gen resistance protects against them.
CS2700 CL	
CS3200 TF*	1st and 2nd Generation Resistance Multigenic resistance provides multiple layers of genetic resistance against disease in fields with heavy clubroot spore loads.

WHEAT, OATS AND BARLEY

Pure, premium-quality seed, produced under the highest standards to meet the demands of farmers and end users.

CERTIFIED SEED

Developed with rigorous production standards, our certified seed offers guaranteed quality, freedom from impurities and the traits you need.

BARLEY

Developed to meet industry demands, no matter the end use – AAC Connect, AAC Prairie, AAC Lariat and AB Wrangler.

WHEAT

With increased yield potential and earlier maturity – CS Accelerate, CS Daybreak, CS Jake and CS Tracker.

OATS

High-yielding varieties that won't fall down – including superstar CS Camden, and our newest additions, Kalio and Kyron.

DURUM

Excellent FHB resistance – AAC Donlow and CDC Credence.

PEAS

The perfect peas in every situation – AAC Carver, AAC Beyond and CS ProStar.

LIMAGRAIN CEREALS RESEARCH CANADA

— Success Through Numbers —

INCREASED TESTING CAPACITY

Limagrain Cereals Research Canada (LCRC) is the largest Hard Red Spring wheat breeding program in North America, and has one of the most extensive trial networks working with wheat, barley and pulses. Local performance is best predicted by local data –LCRC rigorously tests varieties under local conditions to select the best options for farmers.

RAPID BREEDING

Rapid generation advancements gives LCRC the ability to breed new varieties faster than ever before, bringing products unique to Western Canada in record time.

ADVANCED TECHNOLOGY

LCRC's program uses molecular data in combination with advanced statistical tools to make more informative choices when making selections. LCRC tracks the most important genes through molecular markers that control key disease/ insect resistance, agronomic and functional quality traits.

TO LEARN MORE ABOUT OUR REGISTERED LCRC VARIETIES, VISIT [CANTERRA.COM](https://www.canterra.com)

LCRC is a joint venture of CANTERRA SEEDS and Limagrain

WHEAT

	VARIETY	DESCRIPTION	Maturity	Height	Lodging	FHB	Stripe Rust	Leaf Rust	Stem Rust
CWRS	CS Daybreak  VUA	A high-yielding variety with strong disease package best adapted to eastern Prairies	M	+5	G	I	MR	MR	R
	CS Jake 	A variety with very early maturity, great stripe rust resistance, and high protein content	VE	+7	VG	MS	R	MR	R
	CS Tracker 	An awnless early maturity variety with excellent rust resistance, suited to a broad geography	E	+5	VG	I	R	R	R
	AAC Cameron VB  	A very high-yielding midge tolerant variety with lowest FHB symptoms and DON accumulation of all wheat varieties	M	+13	VG	I	S	MR	MR
	AAC Connery 	An awnless variety that combines early maturity with the benefits of short, strong straw and high protein	E	+3	VG	MR	R	MR	R
	Thorsby 	An awnless variety with early maturity and rust resistance, suited to a broad geography	E	+13	G	I	R	R	MR

Variety accepted in the Warburtons Canadian Identity Preserved Program (IP Program)

Midge tolerant wheat variety

HIGH-YIELDING

CS Daybreak

Canada Western Red Spring

A high-yielding CWRS variety with a strong disease resistance package, best adapted for the eastern Prairies

- High grain yield (better than AAC Viewfield)
- Good maturity (similar to Carberry)
- Good protein content (similar to AAC Viewfield)
- Excellent rust package (R to stem rust, MR to leaf and stripe rust) and good FHB resistance (I)
- Good milling and functional quality

YIELD PERFORMANCE

CS Daybreak

AAC Viewfield

The value represents the average number observed during the three years of LCRC registration trials

CS Jake

Canada Western Red Spring

An early-maturing variety with excellent stripe rust protection and higher protein content

- High-yielding potential with improved protein content over current varieties
- Very early, similar to AAC Redwater [-4.2 days vs. AAC Brandon]
- Excellent candidate for the short growing regions in the Parkland areas

QUALITY PERFORMANCE (PROTEIN)

Seed Guides are used as sources for performance

CS Tracker

Canada Western Red Spring

An awnless early maturity variety with excellent rust resistance, suited to a broad geography

- High-yielding potential with improved protein content over current varieties
- Early, similar to AAC Redwater [-4 days vs. AAC Brandon]
- Broad adaptability due to its excellent overall disease resistance

MATURITY PERFORMANCE (+/- 99 DAYS)

Seed Guides are used as sources for performance

AAC Cameron VB

Canada Western Red Spring

One of the highest yielding CWRS for the past five years across the Prairies. As most midge tolerant varieties, it has a taller stature. However, its strong straw offers good lodging resistance

- Very high grain yield every year
- Best FHB resistance and lowest DON content in its class
- Excellent milling and functional quality
- Variety blend with Carberry

YIELD PERFORMANCE

AAC Cameron VB

AAC Wheatland VB

Seed Guides are used as sources for performance. SK Seed Guide, Area 3 & 4

Sometimes there isn't a workaround

Protect Midge Tolerant Wheat by following the Stewardship Agreement

WHEAT

	VARIETY	DESCRIPTION	Maturity	Height	Lodging	FHB	Stripe Rust	Leaf Rust	Stem Rust
CPSR	CS Accelerate  VUA	Very high yield with shorter straw; improved milling quality	M	-3	G	I	R	R	R
	AAC Crossfield 	A desirable combination of high yield, short, strong straw and early maturity; suitable for high inputs and irrigation	M	0	VG	I	R	R	R
CWAD	AAC Donlow 	Lowest DON accumulation in its class with high yield potential and improved standability	M	0	VG	MS*	R	R	R
	CDC Credence 	High-yielding with excellent quality profile, a high yellow pigment concentration and lower FHB symptoms	M	+7	VG	MS*	R	R	R
	AAC Congress 	A high-yielding durum wheat with superior end-use quality and consistent yields	M	+3	G	MS	R	MR	R
CWRW	AC™ Emerson 	A game changer with first R-rating FHB resistance	M	-5	VG	R	R	I	R
	AC™ Radiant 	A top variety for many years	L	-1	VG	S	MS	S	S

*These varieties generally express lower FHB symptoms compared to other MS rated cultivars.

PLANTED BY PROS

CS ACCELERATE

CANADA PRAIRIE SPRING RED 

An early maturing, very high-yielding semi-dwarf CPSR wheat with excellent rust resistance package and improved milling quality.

CS Accelerate is just one of many varieties to come from Limagrain Cereals Research Canada.

- ✓ High grain yield
- ✓ Early maturity
- ✓ Excellent rust package
- ✓ Short, strong straw
- ✓ Part of the Warburtons program

CS Accelerate

Canada Prairie Spring Red

An early maturing, very high-yielding semi-dwarf CPSR wheat with excellent rust resistance package and improved milling quality

- High grain yield (108% of AAC Penhold)
- Early maturity (-1d of AAC Foray)
- Short, strong straw (-10cm of AAC Foray)
- Excellent rust package (R to leaf, stem and stripe rust) and good FHB resistance (I)
- Good milling and functional quality
- Part of the Warburtons program

AAC Connect

2-Row Malting Barley

A top-performing variety with growing demand on the Recommended Malting Barley Varieties List by the Canadian Malting Barley Technical Centre (CMBTC).

- Excellent malt quality with higher malt extract and friability
- Short, strong straw
- Heavier and plumper kernels
- Best FHB resistance in its class

YIELD PERFORMANCE

Seed Guides are used as sources for performance

COMING SOON

AAC Prairie

2-Row Malting Barley

The highest enzyme activity since AC Metcalfe, suitable for adjunct brewing

- Great malting profile with high-enzyme activity
- Short, strong straw
- Good yield potential
- Excellent disease resistance package
- On the CMBTC list: "variety in development"

YIELD PERFORMANCE

Coop trial data is used as source for performance

NEW

AB Wrangler

2-Row Feed and Forage Barley

Very high-yielding feed and forage barley with best FHB protection and excellent standability

- High-yielding potential for grain and forage
- Best FHB protection in its class and low DON accumulation
- Excellent silage nutritional quality
- Great versatility being suitable for all forage and silage growing areas

YIELD PERFORMANCE

Seed Guides are used as sources for performance

Canmore

2-Row Feed Barley

High-yielding feed barley with shorter stature and excellent disease resistance package

- Consistent performer under dry conditions and high moisture environments alike
- Very heavy barley (high test weight) with excellent feed conversion numbers
- Better straw strength than leading variety in the class

HEIGHT (CM)

Seed Guides are used as sources for performance

NEW PULSE BREEDING PARTNERSHIP ^{IN} SASKATCHEWAN

THE PARTNERSHIP

In July 2022, Saskatchewan Pulse Growers (SPG) and Limagrain Field Seeds launched a new pulse breeding partnership. This new partnership has attracted new additional investment and additional pulse breeding capacity in Saskatchewan. Both organizations are contributing germplasm and upfront investments to the collaboration.

THE FOCUS

SPG and Limagrain are focused on pea and lentil breeding, leveraging research sites across Saskatchewan.

Breeding priorities are focused on growers' greatest priorities, identified by SPG, with speed and a commercial focus, including:

- Solutions to root disease in peas and lentils
- Additional herbicide tolerance in lentils
- Yield gains under varying conditions
- Increased protein content

IN THE HANDS OF A PRO

Our extensive field seed portfolio is rooted in the Prairies, with investments in Canadian plant breeding supported by access to the world's best genetics and traits.

CANTERRA SEEDS, PLANTED BY PROS.

WHY CANTERRA SEEDS?

CANTERRA SEEDS is deeply rooted in the Canadian Prairies and offers one of the broadest field seed portfolios in Western Canada. With strategic partnerships around the world and varieties tested locally across Western Canada, we're proud to produce, market and sell the very best in seed.

TOP-QUALITY

seed for every acre on your farm: canola, wheat, oats, barley, peas, lentils

GIVING BACK

to local Western Canadian communities through our Rooted in the Prairies Project

INNOVATIVE

Offering our seed retailers and farmer customers leading digital solutions

INVESTING IN PARTNERSHIPS

with local and global organizations for the benefit of our farmer customer

OUR PEOPLE

are rooted in the Prairies and committed to the success of our customers and partners

Bayer is a member of Excellence Through Stewardship® (ETS). Bayer products are commercialized in accordance with ETS Product Launch Stewardship Guidance, and in compliance with Bayer's Policy for Commercialization of Biotechnology-Derived Plant Products in Commodity Crops. These products have been approved for import into key export markets with functioning regulatory systems. Any crop or material produced from these products can only be exported to, or used, processed or sold in countries where all necessary regulatory approvals have been granted. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for these products. Excellence Through Stewardship® is a registered trademark of Excellence Through Stewardship.

ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. Roundup Ready® Technology contain genes that confer tolerance to glyphosate. LibertyLink® Technology contains genes that confer tolerance to glufosinate. Glyphosate will kill crops that are not tolerant to glyphosate. Glufosinate will kill crops that are not tolerant to glufosinate. Contact your Bayer retailer, refer to the Bayer Technology Use Guide, or call the technical support line at 1-888-283-6847 for recommended weed control options.

Roundup Ready®, Roundup®, and TruFlex® are trademarks of Bayer Group. Used under license.

LibertyLink® and the Water Droplet Design are registered trademarks of BASF. Used under license.

CLEARFIELD® is a registered trademark of BASF; used with permission by BASF Canada Inc.

All other trademarks are the property of their respective owners.
