Management tips — these ratings are well handled with standard practices and don't take away from the variety's value

- **Stripe rust (MS):** scout early in cool, wet seasons; a fungicide at flag leaf controls it well
- **Bunt (MS):** common bunt is effectively managed with a registered fungicide seed treatment

Yield vs AAC Westking by province

Saskatchewan = average of Areas 1 & 2 and 3 & 4; Alberta = overall yield category; Manitoba = % of the check in Seed Manitoba.
